EX PARTE NO. 724 (Sub-No. 5)

PETITION FOR RULEMAKING TO AMEND 49 C.F.R. PART 1250

COMMENTS ON BEHALF OF CN

Kathryn J. Gainey
Counsel, US Regulatory Affairs
CN

Kathryn.gainey@cn.ca

Dated: December 6, 2019

The U.S. rail operating subsidiaries of Canadian National Railway Company (collectively hereafter “CN”) respectfully submit these comments on the Notice of Proposed Rulemaking that the Board served on September 30, 2019 in the above-captioned proceeding (the “September 30th NPRM”).

CN does not object to the Board’s proposal to add a distinct reporting category for “chemical or allied products” for the cars-held metric at 49 C.F.R. § 1250.2(a)(6). Specifically, the Board’s proposal adds a new category to the cars-held metric: “chemicals or allied products (**all remaining STCC 28**)...” (emphasis added). CN submits these Reply comments primarily to inform the Board about the method CN plans to use to identify the “chemical or allied products” commodities to be added to the cars-held metric in 49 C.F.R. § 1250.2(a)(6).

Initially, CN notes that there are two groups of in STCC 28 that are already reported in separate cars-held categories in 49 C.F.R. § 1250.2(a)(6). Aside from the fifteen commodities in STCC 28 for fertilizer that are listed in the Board’s current regulation and recognized in the NPRM,¹ CN includes the following commodities in STCC 28 in the “ethanol” category for the cars held metric: 2818408, 2818416, 2818419, 2818434, 2818445, 2818446, 2818447, and 2818490. The Board should make clear that the “chemicals or allied products” category will not include these other commodities in STCC 28 that are already reported in an existing categories of the cars-held metric to avoid a double count. This will ensure that the new category

¹ September 30th NPRM at 9 (“the Board proposes to include chemical and plastics (STCC 28, except fertilizer) traffic as a distinct reporting category . . .”).

of “chemicals or allied products” does not overlap with commodities currently reported in the ethanol or fertilizer categories of cars held.

For the “remaining” STCC 28 traffic constituting chemicals and allied products, CN plans to use the list of seven digit Standard Transportation Commodity Codes from Railinc for STCC 28 traffic (except fertilizer and ethanol) in effect when the Board’s proposed rule becomes effective. Using Railinc’s list to identify commodities at the seven-digit STCC level included in the “chemicals or allied products” category minimizes regulatory burden to implement the Board’s proposed rule. Those STCC codes are attached as Exhibit 1. There are 1,790 active codes within the STCC 28 group, “chemical or allied products.” Given the large number of STCC codes in this category, it would be impractical to list those STCCs in the Board’s regulation. But using Railinc’s list promotes compliance with the Board’s proposed rule while providing transparency about which seven-digit STCC codes are reported in the category “chemicals or allied products.”

It would be relatively straightforward for CN to create a separate category of “chemicals or allied products” using Railinc’s list to identify commodities at the seven-digit STCC level. CN’s current algorithm for reporting ethanol and fertilizer commodities for the cars-held metric under 49 C.F.R. § 1250.2(a)(6) is coded at the seven-digit STCC level. As indicated, those two categories include some commodities in STCC 28, and CN could use Railinc’s commodities at the seven-digit STCC level to relatively easily create the separate category “chemicals or allied

products” distinct from fertilizer and ethanol and no reconfiguration or testing of its algorithm would be required.²

If CN instead had to create the “chemicals or allied products” category for cars held at a two-digit STCC level, CN would have to build and test a new software algorithm to generate the weekly reports. If this reprogramming is required by the Board for rail carriers to identify the category “chemicals or allied products” at the two-digit STCC level, CN requests a minimum of 60 days from the publication of the final rule to its implementation date. This would allow CN time to make programming changes to its system to ensure compliance.

In conclusion, CN respectfully requests that the Board confirm that a rail carrier may use the list of seven digit Standard Transportation Commodity Codes (“STCC”) from Railinc in effect when the Board’s proposed rule becomes effective to comply with the Board’s proposal that a rail carrier separately report the category of “chemicals or allied products” in the cars-held metric under 49 C.F.R. § 1250.2(a)(6).

² CN understands that new STCCs are occasionally added and become active in the STCC 28.

Respectfully submitted,

/s/ Kathryn J. Gainey
