Subject: Re: Brookhaven Rail Noise-Vibrations-Air Pollution Destroying Our Environment

My name is Lorraine Ambrosio and our family has lived in our home on Easton Street in Ronkonkoma for over 25 years. When we purchased this home we were not bothered by the fact the LIRR was across the street.

In the past year or so there has been a change to the area as far as our home being effected by vibrations, noise and air pollution coming from trains which had not effected this area. This is due to the fact 24 repair garages have been built and trains needing maintenance are passing our homes day and night. Residents are not able to enjoy the outside due to the noise, vibrations and fumes from the passing trains.

Now I understand the Brookhaven Rail will also be using the same route to arrive at their warehouse in Yaphank.

I confirmed this by speaking with an employee who answered my call to the company.

Additional information "Round 2 Priority Projects" include expansion of the rail terminal in Yaphank to include a 500,000 square feet of refrigerated warehouse and a multi-modal rail freight facility to transport products on a off Long Island. Plus much more of transporting products in the future.

Also, I have spoken to residents in Brookhaven Town. They are experiencing the same fumes, vibrations and noise.

Why are you allowing this to take place?

I would appreciate an answer to these questions and concerns.

Thank you,
Lorraine Ambrosio
