Re: Finance Docket No. 36500 – Reply to Objections to KCS Waiver

My name is Kyle Pattison and my business address is 701 1st Street, Clayton, Iowa. I am Owner of Pattison Sand Company (PSC). In my role, I am responsible for the operations and oversight of the company.

PSC has previously submitted to the Board a letter supporting approval of the proposed CP-KCS combination, and I have attached a copy of that letter for the Board's convenience. As expressed in our previous letter, PSC supports swift approval of the CP-KCS combination because of the significant benefits we expect to realize from this transaction.

PSC is aware that several parties have filed objections to the application of the pre-2001 merger rules to the CP-KCS transaction under the "waiver" issued in 2001 for transactions involving KCS. PSC wishes to reply to those objections by urging the Board not to revoke the KCS waiver. The pre-2001 rules provide the Board and all interested parties all the tools that are needed to fully evaluate the proposed transaction.

We are fully cognizant of the Board's mandate to ensure that Class I mergers are in the public interest, and do not risk significant disruptions in the railway system. From our understanding, the unique nature of the CP-KCS transaction alleviates the concerns that motivated the new rules adopted in 2001. Reviewing the CP-KCS combination under the tried and true pre-2001 merger standards will prevent undue delay, while still allowing for a thorough public interest assessment by the Board.

As we have mentioned in our 3/29/21 letter, the end-to-end CP-KCS transaction will improve service options, with new single-line hauls and broader access to markets across North America. Our experience shows us that single-line rail service options are far superior to public and private fleets. The unique synergies of a CP-KCS combination promise significant public benefits to PSC and similarly situated shippers, which we are eager to see realized as soon as possible, without the delays and additional burdens that would result from applying the 2001 rules for the first time ever to this transaction.

Nothing about the CP-KCS transaction raises the kinds of concerns that would flow from a merger of the much larger Class I railroads. The issues should be simple – the transaction improves competitive options and service – and any concerns any party has should be easy to address under the pre-2000 rules. The 2001 rules were designed for much more complex transactions raised much more serious issues, and they should not be tested out in this case.

PSC and our shipping partners are looking forward to a stronger CPKC network that will increase our access to diversified market opportunities. As such, we urge the Board to apply the KCS waiver provision it thoughtfully included in its 2001 Major Merger Rules. An elongated period of review will delay and potentially reduce the positive synergies this merger promises. The KCS waiver will allow the Board to conduct a thorough but efficient and fair review and allow for the benefits of the new CPKC network to come to fruition more quickly.

PSC is additionally concerned that applying the 2001 Major Merger Rules to the CP-KCS merger, a transaction the rules were not designed for, would lead to precedent with unintended consequences and might also create an easier path for some other Class I merger proposals that would be problematic in ways CP-KCS is not. The CP-KCS merger is unlike other Class I merger combinations, in that it is a straightforward transaction between the two smallest U.S. Class I railroads, and it promises substantially more benefits than risks to the public interest. It is our understanding that this transaction, among all possible Class I mergers, is unique in not posing any serious concerns about lost competition, service disruption, or other harms. Interpreting and applying the 2001 rules to this transaction could encourage other Class I railroads to see an easier path for their own Class I merger proposals without the same unique benefits of the CP-KCS transaction.

For these reasons, PSC urges the Board to maintain the KCS waiver and reject calls to revoke it, and to proceed to review and approve the CP-KCS proposed combination as expeditiously as possible. We look forward to seeing CPKC as a stronger competitor in the industry.

Sincerely,

Kyle Pattison
Owner Manager

**STB Finance Docket No. 36500
CP-KCS Proposed Combination**

March 29, 2021

ATTENTION: Surface Transportation Board

My name is Kyle Pattison and my business address is 701 1st Street, Clayton Iowa, 52049. I am of Owner of Pattison Sand Company. In my role, I am responsible for the operation and oversite of the company.

Pattison Sand Company (PSC) is Iowa's only Frac Sand Producer and is an Iowa based family business that roots date back to 1950s & Ag Business. PSC started producing sand in 2008. The quality and value of our product has resulted in a steady growth in our sales. We are located in Northeast Iowa and are exclusively served by Canadian Pacific. We primarily furnish sand to the oil and gas industry in, North Dakota, Texas and Oklahoma via multiple railroads. Over the years CP has provided us with good service, but its market reach is limited, as its lines only go as far south as Kansas City. CP must interline with other railroads to reach destinations beyond Kansas City that we ship to. These complications of multiple railroads in the route limits our ability to expand the markets we serve and puts us at a competitive disadvantage to our competitors who have single-line rail options at their origins.

Moreover, we know from experience (both our own, and that of our competitors who have single-line rail options at their origins) that single-line rail service options are far superior.]

Pattison Sand supports approval of the CP/KCS combination. The completed transaction will have the ability to provide a more seamless route to our customers while providing us with a broader market for our products and services such as rail car storage and other products that may link to Mississippi River and a larger storage facility.

From our understanding, the transaction promises to provide PSC with improved service options and transportation choices in the markets we serve. The combined CPKC network – with new single-line hauls and access would help us reach our existing markets and new markets more efficiently. In addition, with the two railroads' strong focus on safety and operational excellence, CPKC will be able to integrate their operations seamlessly to the benefit of rail customers and other stakeholders

We are excited about the transaction because it will allow a combined CPKC to provide new, more efficient and reliable rail service options. This will strengthen competition against the other, larger rail carriers and trucks that serve our markets.

Visit our web site at www.pattisonsand.com

KCS and CP have had a cooperative relationship in the past, and CP-KCS joint routes are among our transportation options, but as separate companies, they have not been able to offer the kind of seamless, single-line service we have come to expect from our transportation providers. This transaction will improve our transportation options.

At the same time, the entirely complementary nature of CP's and KCS' networks – connecting only at Kansas City and not overlapping anywhere – means that the transaction will not have any adverse effects on competition. It will only make these carriers a better alternative relative to the other options that already exist, since CPKC will continue to interchange with all of their other existing interline partners.

We have been struck by the attention of CP and KCS to safety and operational effectiveness. Given the straightforward network connectivity between CP and KCS, and the fact that CP and KCS are the two smallest U.S. Class I railroads, we are confident that they will be able to implement their transaction without the service disruptions that have accompanied some past rail mergers.

For these reasons, Pattison Sand Company is voicing strong support for the combination of CP and KCS, because it will enhance competition, provide expanded options and drive efficiencies for customers of all sizes. Pattison Sand Company urges the STB to approve CP's acquisition of KCS as swiftly as possible so that these systems can be integrated and the end-to-end benefits of this deal can be realized for the benefit of all stakeholders.

Sincerely,

A handwritten signature in dark ink, appearing to read "Kyle Pattison", with a long, sweeping horizontal line extending to the right.

Kyle Pattison
