Merin,

Here is the ADT date that we have on Emma Park road. As for the other roads they are dirt or gravel roads and we do not at this point have any ADT counts on them.

Thanks,

Casey Hopes

Hi Casey,

Wonderful! For the overall traffic and transportation analysis, it would be helpful to have AADT for any/all county roads you have within Carbon County. For the analysis specific to safety and delay, we are looking for a particular set of roads where the alternatives may potentially cross:

- Whitmore Park Road
- Jack Canyon Road
- Emma Park Road
- Quarry Road
- Horse Creek Road
- Kyune Pass Road
- Minnie Maud Creek Road

Additionally, there will potentially be rail crossings at various unnamed main and arterial well roads. If you have AADT available for any of these well roads, could you send that as well? I realize the county probably does not conduct AADT on every road to every well pad, but it would be great to get an idea for traffic on those roads to develop some assumptions we can use for our analysis.

Let me know if you have any more questions.

Thanks!

Merin

Merin,

There is a good chance that we have the information you need. What I need is to know what specific roads are you wanting that information for? Once I know what roads you are targeting I will see what I can do to help you.

Thanks,

Casey Hopes

Hi Casey,

I am assisting with the traffic delay and safety analysis for the proposed Uinta Basin Railway EIS. I am reaching out to see if you have annual average daily traffic (AADT) data available for county roads within Carbon County. If this information is available, can we please request it?

Let me know if you have any questions, or need more information.

Thanks!

Merin
