Alan

As you noted, no major controversy and STB has been doing a good job of working through the process.

I don't think we're needed and am inclined to recommend we send a no participate letter. However, wanted to touch base first with you.

Let me know if you have any heartburn with that.

John

Hi John. Hope you are doing well and are safe. I wanted to follow up with you regarding the ACHP's role on the Uinta Basin Railway Project and if you are going to formally request to participate in the Section 106 process? We are preparing the draft PA for circulation and review by all the parties and are checking on each participant's anticipated role in the PA. We don't have any major controversy on the project and things seem to be progressing smoothly. I know you have been on our monthly consulting party calls so are keeping up with the progress and the status.

Can you let me know either way? Thanks.
