Cynthia Brown, Chief
Section of Administration
Office of Proceedings
Surface Transportation Board
395 E Street SW
Washington, DC 20423

Re: Docket No. EP 770 (Sub-No. 1), *Urgent Issues in Freight Rail Service—Railroad Reporting*

Dear Ms. Brown:

Pursuant to the Board's May 6, 2022 order in the above-captioned proceeding, enclosed please find CSX Transportation Inc.'s ("CSXT") bi-weekly service progress report providing updates on each of the key service performance indicators identified in CSXT's revised service recovery plan.

Velocity improved for the fifth consecutive bi-weekly progress report, and at 23.4 mph is now right up against CSXT's six-month target of 23.5 mph. Likewise, Industry Spot and Pull (STB Metric 5) improved to 82% (against CSXT's 85% target) for the week ending August 19. Unit Train OTA within 24 hours (STB metric 7(ii)) and Intermodal OTA within 24 hours (STB metric 7(iii)) both improved from CSXT's August 12 report and remain above target levels. Dwell and Manifest OTA within 24 hours (STB Metric 7(i)) remain stable and projected to improve commensurate with Active T&E headcount.

Also enclosed is data regarding the daily average number of employees not available for service and the cause for such unavailability, as directed by the Board's June 13, 2022 order. CSXT's average daily Active T&E population and availability numbers continue to rise and have now improved for the fourth consecutive bi-weekly report. CSX expects availability to continue to improve after Labor Day as the 2022 vacation season comes to a close.

Sincerely,

John P. Patelli
