Re: Docket No. EP 770 (Sub-No. 1), *Urgent Issues in Freight Rail Service—Railroad Reporting*

Dear Ms. Brown:

Pursuant to the Board's May 6, 2022 order in the above-captioned proceeding, enclosed please find CSX Transportation Inc.'s ("CSXT") bi-weekly service progress report providing updates on each of the key service performance indicators identified in CSXT's revised service recovery plan.

Velocity improved once again for the week ended September 2, and has now surpassed CSXT's six-month target of 23.5 mph. Likewise, Industry Spot and Pull (STB Metric 5) improved to 84%, right up against CSXT's 85% target. Unit Train OTA within 24 hours (STB metric 7(ii)) and Intermodal OTA within 24 hours (STB metric 7(iii)) both remain above target levels. Terminal dwell is down nearly a full hour from CSXT's August 26 report, while Manifest OTA within 24 hours (STB Metric 7(i)) has now reached its highest level since bi-weekly reporting began. In short, CSX has now reached 3 of its 6 key service performance targets, and is making significant progress towards the remaining targets.

Also enclosed is data regarding the daily average number of employees not available for service and the cause for such unavailability, as directed by the Board's June 13, 2022 order. CSXT's average daily Active T&E population and availability numbers continue to rise, with average daily Active T&E now above 6,800.

Sincerely,

John P. Patelli
