Subject: CN Divestiture -- A few questions regarding OEA 3rd party contractor site access onto KCS properties

Bill,

Steve Thornhill, OEA's third party project manager from Burns & McDonnell, anticipates visiting the KCS properties next week (weather permitting) and has a few questions regarding the site access form and subsequent requirements.

- Please clarify what is meant by "Licensee." Does it mean an "individual" person, or is it a "group of individuals" under the Burns & McDonnell umbrella? If it means individual, would each on-site person need a license, or is it OK to have one or two people provide this information with a list of the field crew included? EACH INDIVIDUAL NEEDS TO SIGN
- For locations - as the proposed sidings are not located at existing facilities, is it OK to include the nearest road crossing of the line as the location, and if not, how should the locations be designated (mileposts or other)? YES. NEAREST CROSSING IS FINE.

- For the anticipated field date(s), is a specific day(s) required, or will a range suffice? For example, Nov 14 – 16, 2022. Burns & McDonnell indicates that it will not likely be on site more than a few hours at any particular location, but that it's hard to provide an exact time/date, as they are not sure how much time each site will take to document before moving onto the next location. Despite this, Burns & McDonnell anticipates that no more than 2 or 3 days is needed (weather permitting). A DATE RANGE IS ACCEPTABLE.

Steve will send Jeff Songer at KCS an email at least a day in advance to establish a meeting time and location, if necessary.

Thanks much,
Diana
