Re: Cultural Resources Survey in Support of the Proposed Acquisition of Kansas
 City Southern Railway by the Canadian Pacific Railway

Dear Ms. Hunter,

The Surface Transportation Board's (Board's) Office of Environmental Analysis (OEA) is pleased to submit this Cultural Resources Survey Report in support of the OEA's review of a proposal by Canadian Pacific Railway et al. (CP) and Kansas City Southern Railway et al. (KCS) for CP to acquire KCS (Proposed Acquisition). The Proposed Acquisition is an undertaking subject to the Board's federal jurisdiction. If the Board authorizes this Proposed Acquisition, CP and KCS would combine to form an integrated system to be known as Canadian Pacific Kansas City (CPKC), which would be the first railroad to connect Canada, the United States, and Mexico. As part of the review process, OEA is preparing an Environmental Impact Statement (EIS) that will assess the potential environmental impacts of the Proposed Acquisition. OEA is also evaluating the potential impacts of the Proposed Acquisition on historic properties, in accordance with Section 106 of the National Historic Preservation Act (54 U.S.C. § 306108), the Section 106 implementing regulations (36 C.F.R. Part 800), and the Board's environmental regulations (49 C.F.R. Part 1105).

Consistent with past practice in merger cases and the Board's regulations at 49 C.F.R. § 1105.8(b)(1), OEA focused the Section 106 review on 25 planned capital improvements that CP and KCS intend to add within the existing rail right-of-way (ROW) if the Board authorizes the Proposed Acquisition. The 25 planned capital improvements would include adding 10 new passing sidings, extending 13 existing sidings, adding a section of double track, and adding a section of facility working track along the CPKC network within the rail ROW. The planned capital improvements are the only outcomes of the Proposed Acquisition that could have the potential to affect cultural resources. Of the 25 planned capital improvements, nine are located in a county where the Miami Tribe of Oklahoma may have a cultural interest.

Capital Improvement Location	County	State
Blue Valley	Jackson	Missouri
Grandview	Cass/Jackson	Missouri

Capital Improvement Location	County	State
Bellevue/MP 24	Jackson	Iowa
Camanche	Clinton	Iowa
Deer Creek	Clinton	Iowa
Letts	Louisa	Iowa
Turkey River/MP 71	Clayton	Iowa
Washington/MP 255	Washington	Iowa
MP 75	Ogle	Illinois

On behalf of OEA, Vanasse Hangen Brustlin, Inc. (VHB) and Bear Creek Archaeology, OEA's third-party contractors, undertook background research, field survey, and documentation of historic properties within the Area of Potential Effects (APE) for the planned capital improvements.

The APE as defined in 36 C.F.R. § 800.16(d), is the geographic area or areas within which an undertaking may directly or indirectly cause changes in the character or use of historic properties if any such properties exist. The archaeology APE for the Phase I archaeological survey is confined within the existing rail ROW, where ground disturbing activities could potentially occur. Based on our coordination with you, we understand that your interest in this project is confined to the archaeological APE; however, reporting for the above-ground APE is also included in the attached reports. We have provided the reporting for capital improvements in Missouri and Illinois, and information for Iowa will be sent to you in early September when reporting is complete.

Missouri

The Phase I archaeological survey revisited a previously-recorded archaeological site (23CS102) at the Grandview capital improvement; the results of the field survey determined that the previous finding of the site as not eligible for the National Register of Historic Places (National Register) remained valid. A single Isolated Find was located within the APE for the Asbury capital improvement during the archaeological survey, and this Isolated Find has been determined to be not eligible for the National Register. The Proposed Acquisition and associated planned capital improvements would have no effect on eligible archaeological sites in Missouri, as none were located in the APE.

Illinois

The Phase I archaeological survey did not identify any archaeological sites within the APE. The Proposed Acquisition and associated planned capital improvements would have no effect on eligible archaeological sites in Illinois, as none were located in the APE.

OEA's determinations are supported by the findings presented in the attached reports, prepared by VHB. If you have any questions about the reports, or require additional information, please do not hesitate to contact Alan Tabachnick, Historic Preservation Specialist, at alan.tabachnick@stb.gov or 202-245-0367.

Sincerely,

A handwritten signature in black ink, appearing to read "Danielle Gosselin". The signature is fluid and cursive, with the first name "Danielle" written in a larger, more prominent script than the last name "Gosselin".
