Public Record

Good morning,

I am writing to you to share that I fully support Victor Insulator's claim that they are being impacted by bad service. Poor maintenance and insufficient investment have caused service disruptions and higher costs to this business. This business (Victor Insulator) is critical to the upgrades needed in our electrical infrastructure to support electric vehicles.

It is absolutely critical that Finger Lakes Railway Corp., and Ontario Central Railroad Corp maintain the rails better and provide this critical service to Victor Insulators.

Please contact me if you have any questions.
George Heltz
