Adam/Alex:

I am following up on the questions you raised in last week's call. First, the approximate length of the rail line is 2.8 miles.

As for the question about the area identified near Rock Creek (Old Missouri River channel), PortKC's approach to crossing this portion of the MRT property depends on the results of the wetlands delineation study that is under review and development. Depending on the results of that study, a range of options, short of constructing a bridge if possible, will be considered.

PortKC will endeavor to eliminate and/or mitigate impacts to wetlands, if any, in planning and construction, and it will engage and work with the U.S. Army Corps of Engineers in doing so should it be needed.

Thank you,

Justin
