Dear Alan,

I would appreciate if you entered comments from the 8 June 2023 virtual meeting into the official record. I voiced my frustration in that meeting that the official process wasn't being addressed technically or via intent. I still have those concerns and strongly urge the STB to address the intent of the law as well as the letter of the law in providing creative and appropriate resolutions for this adverse taking. You know that both NHPA and ACHP regulations require this.

The public have waited long enough to be apart of this decision and to enjoy this incredible resource.

Sincerely,
Diane Kaese
