To Alan Tabachnick:

I have lived on Second Street in Jersey City for more than 30 years. We are just a few blocks from the Embankment and have been involved in efforts to save this wonderful structure for decades.

We recently heard that the STB is considering authorizing the abandonment of the Harsimus Branch without historic preservation conditions. This is a terrible idea. After years of fighting to preserve the Embankment, working closely with public officials in Jersey City, we are close to having a plan in place. Please do not do anything to jeopardize these efforts.

Thank you.
