Service Progress Report

August 11, 2023

Union Pacific EP 770(1) Service Progress Report

The Surface Transportation Board has directed Union Pacific to file a progress report to describe how the railroad's improvement actions, as outlined in the service recovery plan filed on May 20, 2022, and Revised Plan, filed on June 23, 2022, and Interim Update, filed on December 2, 2022, are leading to better service.

Below is an update on Union Pacific's Key Performance Indicator metrics:¹

Locomotive Initiatives

Union Pacific's operable locomotive fleet is ~4,250 units, consistent with our forecasted demand for the second half of 2023.

Train velocity on the network has improved by 15% since mid-April 2022. We continue to evaluate our optimal fleet size given network fluidity, engine utilization, and current and projected network demand. The number of trains holding for power was relatively consistent at 14 trains per day for the week ending August 4, 2023, compared to our last report. Union Pacific temporarily deployed ~40 additional locomotives to support the network recovery.

Finally, we continue to receive newly modernized locomotives and utilize them on the network. These modernizations double the reliability of each individual unit, which improves the overall productivity of the network.

Crew Initiatives and Availability

¹ Current performance is based on the week ending August 4, 2023. The Target Range and Target Midpoint are those previously reported in Union Pacific's December 2022 Interim Update.

Year to date, Union Pacific has graduated 1,435 employees, including 2,514 since May 6, 2022.² The train, engine, and yard (“TE&Y”) training pipeline currently has 530 employees. During this reporting period,³ 33 trainees entered training, 27 trainees dropped out, and 145 trainees completed training.

Union Pacific currently has 156 borrow-outs deployed across the system as we continue to actively reallocate resources to match crew supply to crew demand. These geographically flexible workforce resources are critical to our efforts to support the movement of freight across the network. Our borrow-out strategy is in place to handle projected demand and to provide greater resiliency in our network when significant unanticipated events increase demand.

Union Pacific’s data show the average percentage of Union Pacific’s total qualified TE&Y employees available to work on a given day. Available workforce is defined as those active TE&Y employees not in a recall, bump, or training status, and those not laid off absent from their working assignment. The following chart illustrates the key drivers of availability for Union Pacific’s workforce. These numbers are a percentage average of all groups of qualified TE&Y employees. The key drivers for crew availability are defined as follows: (1) Available to Work, (2) Vacation/Personal leave (“PL”) – paid vacation days or Personal Leave Days of compensated absences, (3) Family Medical and Leave Absences (“FMLA”), (4) Illness – Layoff Sick or Layoff Sickness in Family, and (5) Other – all other layoff categories including HP (Health and Medical), Bereavement Leave, Missed Call, Layoff Personal Reasons, No Show, or layoff on call, among others.
