I would like to see the embankment similar to the high line in New York. It has so much green space that is needed in our city. Look at how Central Park has benefited New Yorkers. Please save the embankment and keep it a green space for the community and for future generations.

We have enough big high risers on the waterfront. Even the first part on Marin which I understand is to be developed they can buildup around it and keep the embankment as type of huge cornerstone of it.

We need green. We need nature. Thank you.

Maryanne serafin.

You can read my statement. By the way I grew up here in jersey city and when I went to st Anthony's grammar school we watched the trains go by. And listened to them all night long in the distance. We need to keep some history. Too bad they destroyed railroad ave. They could have used it for transportation today.

"Start by doing what's necessary; then do what's possible; and suddenly you are doing the impossible."
