Thank you. I don't think a meeting is necessary. I was just curious if this was a deal breaker on the project. Otherwise, projects get delayed for different reasons. I'll let the railroad deal with that.

Jason,

At present, the damage to historic resources within the UP right of way has led to a stay of the environmental review and added months to the historic review. If you would like to schedule a time to discuss our parallel processes, and how their timelines may not align, I'd be happy to schedule a call for some time early next week.

Thanks,

Adam Assenza

Ok. I understand the site had a delay related to historical data. Will that cause the railroad's request to be rejected or delayed?
