Re: Docket No. FD 36406: Proposed New Rail Line in Kansas City, MO

Good Evening,

Thank you for informing the National Geodetic Survey (NGS) of the Port Authority of Kansas City's proposed construction of a new 1.7 mile rail line in Kansas City, MO.

A search of our database showed no (0) geodetic survey marks in the area described that would be impacted by the proposed construction.

For additional information, please see <https://geodesy.noaa.gov/surveys/mark-railroad/index.shtml>.

Regards,
