Hi Adam and Alan,

So sorry for the delayed response, it was a busy past month! I took a look and everything looks great. The one change I would made is that the most updated version of the Standards for Cultural Resource Reporting is April 19, 2023 instead of sometime in 2020. I don't think there were any changes made to the built environment sections, but just so the consultants aren't searching around for the 2020 copy. Other than that, I think it is ready to sign. Le me know when Patriot Woods has signed and I will send it over to our Director for signature.

Thank you for you hard work on this!

Hello Maddie,

Please find attached a draft version of the MOA, retaining in large part the whereas clauses and stipulations of the original now-expired MOA, with a few added for clarification on its expiration and the need for recirculation/reissuance.

We welcome any notes that the Washington SHPO's office has to this draft and will make recommended changes before circulating to the larger group of Section 106 consulting parties.

Regards,

Adam Assenza

Thanks. We have that in there with a few other minor clarifications. Should be coming your way in the next few days for your review.

Hi Alan,

Including a whereas explaining that the original agreement had expired would be a good idea.

Thank you,

Maddie Levesque (they/them) | *Architectural Historian*

Hi. We are working on the new MOA now. Do you want to see whereas clauses added explaining that the previous MOA expired before the terms could be met? Or do we not need to include that level of detail and explanation? I would tend towards including a clause about that but wanted to check with you first. Thanks much.

Hi Alan,

Thank you for reaching out. Since the MOA has expired, we will want to reinitiate the consultation process and draft a new MOA. This can basically be the stipulations that were not met and a new expiration date. Not too difficult of a process, but happy to answer any additional questions you may have!

Best regards,

Hi. I wanted to set up a time to talk about this project and the status of the Section 106 process. The project involves the abandonment of an eligible segment of the Columbia & Cowlitz Railway. Our agency determined that the abandonment would cause an adverse effect and we executed a MOA with your office to resolve the adverse effect. Unfortunately, the applicant did not complete the required documentation elements in the MOA prior to its expiration in June, 2023. I wanted to meet with you to talk about the best way to move this forward and talk about preparing a new MOA for execution.

I am available all of next week so please let me know when you might be available. If you have any questions, please let me know. Thanks very much.
