Subject: RE: PIRATE - Kinder Morgan Activity
Date: Friday, September 20, 2024 7:25:48 PM

Good afternoon.

Our UP team has been reaching out to Kinder Morgan to build our understanding on the proposed work. UP received verbal confirmation, via phone, an overview of the proposed project. Kinder Morgan advised that they will be following up with an email shortly detailing the desired work. Kinder Morgan indicated that their scope of the project will require a ground disturbance to install a zinc wireline to protect the pipeline from an overhead transmission wireline with an 8" by 4" deep trench. The work in the wye area was scheduled by KM to begin in about a week.

Per our previous notification to Kinder Morgan, UP again today reiterated to Kinder Morgan that no work can be done prior to obtaining STB approval. UP will forward on details as soon as they are received and are happy to discuss further on Monday or anytime next week. Thank you.

Subject: PIRATE - Kinder Morgan Activity

*** PROCEED WITH CAUTION - This email was sent from outside the company. ***

UP team: our field crew spoke to an inspector on-site this morning from Kinder Morgan, within Damage Area 1 in the wye area. The inspector indicated that they are planning to install a zinc line between Pecos and Sossaman Roads in the next 3-5 days. Is UP aware of this proposed activity? We'd appreciate any additional details you can share, including whether the work will occur within

the PIRATE APE and if ground disturbance is required. If the answer to those questions is yes, we'd like to make sure a cultural monitor is present for the work.

We'd be happy to join a quick call today or Monday if it would be easier to discuss this as well.

Thank you,
