Subject: [EXTERNAL] RE: PIRATE: Kinder Morgan Zinc Line Installation

Ms. Buckley,

EPNG is trying to accommodate the UPRR facilities as well as the cultural area, but are needing information regarding the UPRR track layout before we can finalize – can you please respond if you are able to provide this information?

As mentioned in my voice mails to you, this project was scheduled to begin construction the end of this week, so a prompt response would be greatly appreciated.

Importance: High

Ms. Buckley,

Would you be able to add an overlay to the KMZ with the track locations within the APE for the WYE area circled in the attached PDF?

Its likely we would wish to avoid these areas and would like to review before confirming total work area.

Thank you,

Deborah White, SR/WA-NAC

Ms. Buckley,

Thank you for your email. Amy Blythe is EPNG's Environmental Specialist, and Deb White is assisting EPNG Land. They will be able answer any questions you may have.

Amy/Deb,

Please see Ms. Buckley's email below.

Sincerely,

Nick Amoroso

Good afternoon Mr. Amoroso,

I am supporting the Surface Transportation Board's (Board) Office of Environmental Analysis (OEA) in the environmental review of Union Pacific Railroad (UP's) proposed Pecos Industrial Rail Access and Train Extension (PIRATE) rail line in Mesa, Arizona. A figure showing the general limits of the proposed rail line is attached, as well as a shapefile and kmz of the PIRATE area of potential effects (APE).

We are currently conducting an invasive archaeological damage assessment of unauthorized excavation in UP's right-of-way, for which Kinder Morgan has an easement. During field work this morning, September 20th, our staff spoke to an inspector from Kinder Morgan that indicated that Kinder Morgan is planning to install a zinc line between Pecos and Sossaman Roads in the next 3-5 days. Given the archaeological sensitivity in this area, we'd like to clarify whether this line installation will occur within the PIRATE APE and whether it requires ground disturbance. If it does, OEA would like to coordinate with Kinder Morgan to ensure that a qualified archaeological monitor is on-site during the installation.

We'd appreciate any additional information regarding the specific timing and nature of this work. Please feel free to contact me or OEA (cc'd here) with any questions or information you can share:

- Adam Assenza, STB OEA Environmental Protection Specialist, 202-245-0301
- Alan Tabachnick, STB OEA Federal Preservation Officer, 202-245-0367

Thank you,
