Elizabeth Webster, Surface Transportation Board

SUBJECT:Docket No. FD36833, Lampwrights LLC

Dear Ms. Webster :

Thank you for the opportunity to review the project map for the Lampwright LLC Project . The United States Department of Agriculture, Natural Resources Conservation Service (NRCS) does not maintain or hold any easements within the project area. Therefore there will be no impact to any of our NRCS projects from the proposed infrastructure line replacement.

If this project is to receive federal funding it will need to be evaluated for its impact on farmland per the Farmland Protection Policy Act. If the project is to receive federal funds, please fill out Parts I and III of the attached AD-1006 and provide web soil survey maps along with a shapefile of the disturbed areas and acreage impacted. If this project will not receive federal funds, then no further action is needed.

If you have additional questions or concerns, please feel free to contact me at 717.317.3155 or email to tyson.myers@usda.gov

Sincerely,

TYSON MYERS
