Mr. Marchiori,

As I mentioned we are still early in the process but the environmental document will be available to the public. You will be notified when it is issued. The draft environmental document will seek comments on all aspects of the analysis and give the public an opportunity to comment.

Thanks,
Elizabeth

Subject: RE: [External] Lampwrights llc filing

Ms. Webster

Again, thank you for your time. This seems very unfair that an entity can show you the property and explain details on that behalf but unfortunately the residence, that a project like this will affect cannot have a mutual intelligent conversation. We have a nice community, and our officials have spoken up concerning this issue. The truck traffic is a mere increase of 2%-5% or less.

We feel Noble Environmental can not move forward without your assistance in acquiring the remaining pieces of land.

If an environmental review is being conducted, how do we see the results of the review?

Best Regards,
Chuck Marchiori

Mr. Marchiori,

Thank you for your continued interest in this proceeding. As you mentioned, the Board conducted its initial site visit in Brockport last week. The site visit is a chance for the Board's Office of Environmental Analysis (OEA) to see the area of the proposed construction and consider potential environmental impacts. OEA typically does not include local representatives or members of the public in these visits.

We are still early in the process and the next step is preparation of the draft environmental document. The document will address potential impacts, including information and observations from the site visit. The draft environmental document will seek comments on all aspects of the analysis. We would welcome your additional comments during that phase of the review.

Let me know if you have any other questions about OEA's environmental review process.

Thanks,

Elizabeth Webster

Hello Ms. Webster

It's been my understanding that STB has been reviewing the project this week. We would like to understand the thoughts of STB and its findings.

It would have been a nice gesture on behalf of Noble to give us notice and invite a local representative on behalf of the residence of Brockport, however to my knowledge this did not occur.

Hopefully, you saw the repair work on the rail grade with sandstone. The local wildlife and trout streams and our local beaver dam.

You or your team saw Nature is healing the land along with some assistance of several organizations and hard work.

I thank you for your time

Hello Mr. Marchiori,

Thank you for your interest in this proceeding. We are still in the preliminary stages of the environmental review process and the petition has not yet been filed formally with the Board. A proposed rail line construction is subject to the National Environmental Policy Act (NEPA). To fulfill the Board's responsibilities under NEPA, the Office of Environmental Analysis (OEA) will prepare an environmental document addressing potential impacts of the proposed project. Through the

environmental review process, the proposed railroad alignment may change because the environmental document that evaluates the potential environmental impacts may identify alternatives.

OEA sent letters soliciting preliminary comments from elected officials; federal, state and local agencies; and tribes, but there will also be a public comment period after we prepare the draft environmental document. The draft environmental document will seek comments on all aspects of the analysis. We would welcome your comments during that phase of the review. Unfortunately, we cannot include the public in our meetings at this time, but there will be opportunities for consultation and public involvement as the environmental review progresses.

In the meantime, questions regarding the Board's procedures can best be addressed by contacting the Board's Rail Customer and Public Assistance (RCPA) service. They can be reached at **(866) 254-1792** (toll-free) or **202-245-0238**, or by emailing rcpa@stb.gov.

Thanks,
Elizabeth Webster

You don't often get email from cmarchiori@abbottfurnace.com. [Learn why this is important](#)

Hello Ms. Webster

I received a phone call from a Nico Mermigas today from phone number [REDACTED] (just to prove I did) @ 3:38 pm and he mentioned about someone from our group sitting in on the weekly calls. He mentioned that he did not have the power to authorize this alone but I (we) am asking if this could be a possibility.

Please let us know if this is a possibility. We at this time feel many mistruths are being made and want YOU to have a very good understanding of our home., its history, and the long hard work its taken to bring Toby Creek back from a polluted stream.

Best Regards,

Subject: Lampwrights llc filing

Hello Ms. Webster

This filing from Lampwrights LLC indicates that Conrail was last owner of the railroad. Conrail was formed in 1976. The Interstate Commerce Commission received railroad abandonment of the Erie Lackawanna Railroad Company for this section of railroad, property, and land in February of 1973. This was accepted by the United States District Court and Order #59 was executed.

Can you please assist us in our research with the filing with Conrail, we are unable to find any documentation concerning Conrail in our local records, and University's libraries in Pennsylvania and Ohio.
