You don't often get email from firstapostlesdoctrinechurch@gmail.com. [Learn why this is important](#)

Surface Transportation Board

To whom it May Concern:

Hello, I am writing today about the proposed train that would be carrying trash to the Greentree Noble Landfill. I live in Brockport, PA and my property would be one of the pieces of land the tracks would want a right-of-way through. The train running on my property and that close to my house would make the house an unlivable home, because of the lack of peace that the train would cause.

I also have other concerns with the proposed location of the railway. I would run over the driveway of the property adjacent to mine. That property is the location of the church I attend, The First Apostles' Doctrine Church. The church operations would be severely impacted. The Pastor's personal home is also on the same property as the Church Sanctuary. The railroad would impair access to his home, by eliminating a large portion of his personal driveway.. It would also be a hinderance to the work he does daily for the church and the people he helps.

The Church supports the Just For Jesus Homeless Outreach Ministry and many of the trade opportunities available to the homeless guests of the ministry are on that property. There is a lumber mill that would have to be taken down completely. The mill provides training to those trying to get back on their feet as well as providing an income for the support of the ministry. The ministry provides a valuable resource to the local community by training people to be able to fill jobs in the surrounding areas.

There is a second house on the property which is used to house some of the homeless guests of the ministry as well, and the train would impact those living there as well.

Sincerely,

Sarah-Grace Buddenbohn
