To Whom It May Concern:

This letter is about the property where they want to put a trash train through where my church, the homeless outreach, the mill is located. Bishop Wisor has provided a place where people can make a life for themselves.

The rail line could destroy all of this and all of the help that Bishop Wisor gives to people. My name is Joe and I had no where to go and this man of God (Bishop Wisor) took me in and showed me the skills that I would need if I ever was to leave this ministry.

Bishop showed me how to understand the Bible and read it also. He also showed me how to cut wood, and make a project out of it. He showed me how to pray for myself and others and how to care about others instead of myself. He's a great preacher and home builder.

When someone on the street needs his help and calls on him, he's Johnny on the Spot. When people need a ride and don't know where their next meal is coming from, he will bring them to his homeless outreach ministry.

This property is useful in every sense and will be useful in the future. People need a church. Bishop cares about your soul. Do not destroy this place! Bishop is a preacher who will take you in if your need a place to stay and will give you a Word from God.

I pray that this property will be left alone for the Gospel to be preached until the very end. There is no other ministry like this anywhere. Please do not let them take away the future for so many in need.

Thank you.

Joe Russell
