Re: Docket No. FD 36633, Plaquemines Port, Harbor & Terminal District (PPHTD) – LGP Rail Extension Line in Plaquemines Parish, Louisiana

Dear Ms. Poole:

We appreciate the continued efforts of your office in reviewing the LGP Rail Extension project. Your team's work over the past several months has been invaluable, and we look forward to future collaboration as circumstances allow.

At this time, we respectfully request an indefinite suspension of the environmental review process. This request is due to internal matters that require resolution before we continue participating effectively in the review. Unfortunately, we are unable to determine when those issues will be fully resolved. Because of the uncertainty surrounding the timeline, we believe that suspending the review at this stage will prevent unnecessary expenditure of time and resources for all parties.

We will promptly notify your office as soon as we are able to resume the environmental review process.

Thank you for your understanding and consideration. We appreciate the professionalism of your team and will remain in contact as developments occur.

Respectfully submitted,

Celeste Bergeron, MPE
Director of Projects
Louisiana Gateway Port
