**BEFORE THE  
SURFACE TRANSPORTATION BOARD**

---

**UNION PACIFIC RAILROAD  
COMPANY**

**v.**

**BNSF RAILWAY  
COMPANY**

---

**Docket No. NOR 42188**

**COMPLAINT**

1. Effective May 1, 2026, BNSF Railway Company (“BNSF”) canceled its longstanding reciprocal switching rates for many unit train grain shipments, thus forcing multiple grain shippers located on BNSF lines with reciprocal switching access to Union Pacific Railroad Company (“Union Pacific”) to pay the per-car rate for merchandise traffic in order to ship grain on Union Pacific. This action almost tripled the switching rate for unit train grain shipments bound for Union Pacific. Indeed, BNSF informed multiple customers and Union Pacific that it would refuse to perform reciprocal switching for unit trains of grain shipping to or from customer facilities via Union Pacific.

2. BNSF is also drastically increasing its reciprocal switching rate for other commodities at a few targeted locations. For example, effective May 1, 2026, the rate for most commodities at Grand Island, NE to be switched to Union Pacific increased by 472% (from \$295 to \$1395).

3. These dramatic changes have a common element—they are occurring at locations where Union Pacific has recently won or grown business from customers located on BNSF's lines to which Union Pacific has reciprocal switching access. BNSF's changes to longstanding rates and practices were made with little advance warning or explanation.

4. The effect—and on information and belief, the intent—of BNSF's drastic tariff changes and refusal to accept unit trains of grain is to make Union Pacific's service for the affected customers noncompetitive, and thus to force shippers to use BNSF service rather than their reciprocal switching access to Union Pacific.

5. Union Pacific and the customers targeted by BNSF's action have attempted to resolve these issues directly with BNSF, and targeted customers also have contacted Rail Customer & Public Assistance staff directly for resolution. BNSF has thus far refused to rescind its tariff changes.

6. Union Pacific does not question the right of BNSF or any carrier to adjust the rates it charges to suit market conditions (so long as the rates are reasonable). Nor does Union Pacific question the right of BNSF or any carrier to change its tariff offerings to reflect operating needs. But this is not an ordinary case of a railroad adjusting its switching tariff to flexibly respond to the market. It is instead a tariff change that appears to have been made in order to cut off competitive options for shippers that have chosen to take advantage of their access to Union Pacific's service.

7. BNSF's sudden and extreme changes constitute an unreasonable practice, because they are designed to preclude customers from access to Union Pacific options that they have long employed and to retaliate against Union Pacific and shippers who have used switching to access Union Pacific.

8. Moreover, it is necessary for competitive rail service for the Board to prescribe switching at the locations identified herein, and to impose a reasonable rate for that switching if BNSF will not agree to one. BNSF's conduct constitutes an abuse of market power that satisfies the statutory standard of 49 U.S.C. § 11102(c) and the current 49 C.F.R. Part 1144 rules.

9. For these reasons, Union Pacific brings this Complaint under 49 U.S.C. §§ 10702, 10704, 11102, and 11701, and seeks a determination that certain operating changes and revisions to switching tariffs by BNSF Railway Company in BNSF Switching Book 8005-E that took effect on May 1, 2026, and any amended or successor tariffs, are unreasonable and unlawful and shall not be enforced or given. Union Pacific further seeks an order under 49 U.S.C. § 11102(c) prescribing reciprocal switching agreements at locations in terminal areas, and a determination that such reciprocal switching is necessary to provide competitive rail service.

### **PARTIES**

10. Complainant Union Pacific is a Class I railroad that operates in the western United States. Union Pacific is headquartered in Omaha, Nebraska at 1400 Douglas Street, Omaha, Nebraska 68179, and is incorporated under Delaware

law. Union Pacific is a rail carrier subject to the jurisdiction of the Surface Transportation Board under Title 49.

11. Defendant BNSF is a Class I railroad that operates in the western United States. BNSF is a wholly-owned subsidiary of Berkshire Hathaway Inc. BNSF is headquartered in Fort Worth, Texas at 2650 Lou Menk Drive, Fort Worth, Texas 76131, and is incorporated under Delaware law. BNSF is a rail carrier subject to the jurisdiction of the Surface Transportation Board under Title 49.

### **FACTUAL ALLEGATIONS**

12. Union Pacific and BNSF fiercely compete for business. They compete on rates and on service, and customers benefit from that intense competition. One of the many places where Union Pacific and BNSF compete is at locations that are open to reciprocal switching.

13. Like other railroads, Union Pacific and BNSF publish switching tariffs that provide the rules and definitions associated with switching services that they offer. They identify customer locations with access to reciprocal switching and the applicable charges at those locations.

14. Carriers often have reciprocal arrangements for switching access. Many of the customer locations and rates published in Union Pacific's and BNSF's switching publications are longstanding arrangements. BNSF's switching tariff is referred to as a Switching Book. On information and belief, BNSF's Switching Book was adopted in 2003 and has been amended from time to time thereafter. A 2014

version of BNSF's Switching Book, which at that time was titled BNSF Switching Book 8005-D, is attached as Exhibit A (hereafter "BNSF 2014 Tariff").

15. Exhibit B is the former version of BNSF's Switching Book, 8005-E, that was made effective on March 24, 2026 (hereafter "Former BNSF Tariff").

16. Exhibit C is a new version of BNSF Switching Book 8005-E that BNSF published on April 1, and that became effective on May 1, 2026 (hereafter "Current BNSF Tariff"). The Current BNSF Tariff makes dramatic changes to the Former BNSF Tariff.

17. At multiple locations, the Former BNSF Tariff provided a special reciprocal switching rate for unit train shipments of certain grain commodities on Union Pacific of \$105 per car. This rate was applicable at 90 locations. The unit grain rate was lower than the \$295 per car rate applicable to other cars switched at those locations.

18. The Current BNSF Tariff eliminates the switching rates for unit train grain shipments at certain specified locations, including Hastings, NE; Havelock, NE; Island Park, IA; Lincoln, NE; and Saginaw, TX. The effect of this change would be to increase the switching rate for unit grain shipments shipping via Union Pacific at those locations by 281% (from \$105 to \$295).

19. Union Pacific has handled unit grain trains that were subject to the unit train reciprocal switching rate at each of these targeted locations: Hastings, NE; Havelock, NE; Island Park, IA; Lincoln, NE; and Saginaw, TX.

20. In addition to the changes in the Current BNSF Tariff, BNSF has also informed certain customers at these targeted locations that BNSF will not allow Union Pacific to ship unit trains to or from these customer facilities, and that any unit train shipments could only be made on BNSF. This apparent prohibition is not reflected in the Current BNSF Tariff. *See* Exhibit C, Section 1 (unit train shipments not listed in exclusions generally), *id.* at 13, 14, 15, 17, 20, 28 (unit train shipments not listed as exclusions for specified locations).

21. BNSF's actions to remove unit train rates and inform customers that BNSF will no longer provide reciprocal switching for Union Pacific unit trains has caused considerable disruption in grain markets, because grain buyers and sellers often place orders and make commitments months in advance and must be able to plan based on their future transportation options.

22. BNSF has already begun rejecting unit train shipments pursuant to these new targeted policies. On May 10 BNSF rejected an empty unit train bound for a customer at Island Park, IA. The customer's unit train was forced to turn back to a UP yard to be cut because BNSF would only accept cars for the customer in manifest blocks. On May 13, BNSF rejected a loaded unit grain train at normal interchange in Saginaw, Texas. The customer's unit train had to reroute to the Union Pacific yard in Fort Worth, Texas, and will be forced to split into numerous blocks, and interchanged to BNSF instead over the course of several days.

23. The Current BNSF Tariff makes further drastic increases in its reciprocal switching rate for other commodities at a few targeted locations, including Grand Island, Nebraska.

24. On information and belief, the changes to the Current BNSF Tariff are targeted to locations where customers have recently chosen Union Pacific service, as detailed below.

Hastings, NE

25. The Former BNSF Tariff provided reciprocal switching access and rates for several customer facilities at Hastings, Nebraska, including Cooperative Producers Inc. (“CPI”).

26. CPI’s facility in Hastings is physically served by BNSF, and Union Pacific provides transportation to them through reciprocal switching. The handoff occurs on track that is jointly-owned by Union Pacific and BNSF in the Hastings area.

27. Dating back to at least 2014, BNSF has listed CPI at Hastings as open to reciprocal switching in its switching circular with a switching charge of either \$105 per car for unit train shipments of grain or soybeans or \$295 per car for shipments of other commodities. *See Exhibit A at 7.*

28. Under the Former BNSF Tariff, the switching rate for unit trains of certain grain commodities is \$105 per car and the switching rate for other commodities is \$295 per car. Below is an image of the applicable language, at page 15 of Exhibit B:

HASTINGS, NE	
Road	Switch Charge Per Railcar
UP (Note 1)	\$105
UP	\$295
Note 1 - Reciprocal Switching charges apply only on Unit Train shipments (50 railcars or greater) of the following commodities: Grain: 01131, 01135, 01139, 01132, 01133, 01137, 01139, 01144	
Industry	Address
AG Processing Inc	2801 E 7th St
AGP Grain Marketing LLC	2315 Hwy 6
Chief Ethanol Fuels Inc	4225 E South St
Columbia Grain International LLC	4935 E J St
Cooperative Producers Inc	265 N Showboat Blvd
Equalizer Midwest Inc	4955 E S St

29. CPI has shipped unit grain trains via Union Pacific using these reciprocal switching rates since at least 2014. The majority of CPI's traffic via Union Pacific has been pursuant to the unit train grain rate.

30. Prior to April 1, 2026, Union Pacific expected CPI's 2026 volume via Union Pacific to increase 70% versus CPI's 2025 volume.

31. The Current BNSF Tariff eliminates the switching rates for unit train grain shipments at Hastings. The effect of this change is to increase the switching rate for unit grain shipments by 281% (from \$105 to \$295). The Current BNSF Tariff was published on April 1. Below is an image of the applicable language of the Current BNSF Tariff, at page 15 of Exhibit C:

HASTINGS, NE	
Road	Switch Charge Per Railcar
UP (Note 1)	\$105
UP	\$295
Note 1 - Reciprocal Switching charges apply only on Unit Train shipments (50 railcars or greater) of the following commodities: Grain: 01131, 01135, 01139, 01132, 01133, 01137, 01139, 01144	
Industry	Address
AG Processing Inc	2801 E 7th St
AGP Grain Marketing LLC	2315 Hwy 6
Chief Ethanol Fuels Inc	4225 E South St
Columbia Grain International LLC	4935 E J St
Cooperative Producers Inc	265 N Showboat Blvd
Equalizer Midwest Inc	4955 E S St

32. On or about April 1, 2026, CPI was made aware of amendments to the BNSF Switching Book 8005-E, including the removal of the Reciprocal Switching charges for unit trains for Hastings, Nebraska. CPI's expectation is that it can continue shipping unit trains on BNSF.

33. On April 1, 2026, Union Pacific asked BNSF whether Union Pacific would be allowed to continue to ship unit trains of grain to customers at this location. On April 13, 2026, BNSF stated in writing that it would not accept unit trains for interchange for this location and instead would only interchange manifest traffic.

#### Grand Island, NE

34. The Former BNSF Tariff provided reciprocal switching access and rates for two customer facilities at Grand Island, Nebraska. One of those customers is JBS U.S.A. LLC ("JBS").

35. JBS's facility is physically served by BNSF, and Union Pacific provides transportation to it through reciprocal switching. Pursuant to a 1996 agreement between Union Pacific and BNSF, the handoff occurs at Union Pacific's yard in Council Bluffs, Iowa.

36. In that 1996 agreement, UP and BNSF agreed to relocate the former interchange point at Grand Island to Council Bluffs, and that neither party would pay any fee for the interchange location, and that reciprocal switch charges would continue to be charged at Grand Island.

37. Dating back to at least 2014, BNSF has listed JBS at Grand Island as open to reciprocal switching in its switching circular with a switching charge of either \$105 per car for unit train shipments of grain or soybeans or \$295 per car for shipments of other commodities. See Exhibit A at 7.

38. Under the Former BNSF Tariff, the switching rate for unit trains of certain grain commodities was \$105 per car; the switching rate for refrigerated boxcars was \$595 per car, and the switching rate for other commodities was \$295 per car. Below is an image of the applicable language, at page 14 of Exhibit B:

GRAND ISLAND, NE - Interchanged at Council Bluffs, IA	
Road	Switch Charge Per Railcar

Note 2 - Reciprocal Switching charges apply on all shipments in refrigerated boxcars.	
Industry	Address
Agricultural Service Inc	2777 N Broadwell Ave
JBS U.S.A. LLC	555 S Stuhr Rd

39. JBS has shipped tankage and tallow via Union Pacific using these reciprocal switching rates since at least 2006. JBS’s tankage and tallow are used as feedstocks for the renewable fuel industry. Union Pacific has a strong presence in the renewable fuel industry connecting feedstock locations like JBS with end users.

40. Much of JBS’s tankage and tallow traffic via Union Pacific is pursuant to the general commodity rate of \$295 per railcar.

41. In late 2024, JBS and Union Pacific entered into an agreement in which JBS awarded a significant volume of its traffic to Union Pacific. As a result, Union Pacific’s share of JBS traffic grew in 2025 and is expected to grow in 2026.

42. The effect of the Current BNSF Tariff is to increase the switching rate for JBS’s commodities by 472% (from \$295 to \$1395). Below is an image of the applicable language, at page 14 of Exhibit C:

GRAND ISLAND, NE - Interchanged at Council Bluffs, IA	
Road	Switch Charge Per Railcar
UP (Note-1)	\$105
UP	\$1,395
UP (Note-2)	\$605
Note 1 - Reciprocal Switching charges apply only on Unit Train shipments (50 railcars or greater) of the following commodities: Grain: 01131, 01135, 01130, 01132, 01133, 01137, 01139, 01144	
Note 2 - Reciprocal Switching charges apply on all shipments in refrigerated boxcars.	
Industry	Address
Agricultural Service Inc	2777 N Broadwell Ave
JBS USA LLC	555 S Stuhr Rd

Island Park, IA

43. The Former BNSF Tariff provided reciprocal switching access and rates for Bunge North America Inc. (“Bunge NA”) at Island Park, Iowa.

44. Bunge NA’s facility is physically served by BNSF, and Union Pacific provides transportation to it through reciprocal switching. The handoff occurs in Council Bluffs, Iowa pursuant to an interchange agreement that governs the hand off of unit train traffic for specifically for this facility. It allows Union Pacific access to BNSF trackage as well as a small portion of IAIS trackage.

45. Dating back to at least 2014, BNSF has listed Bunge NA at Island Park as open to reciprocal switching in its switching circular with a switching charge for Union Pacific of either \$105 per car for unit train shipments of grain or soybeans or \$295 per car for shipments of other commodities. See Exhibit A at 8.

46. Under the Former BNSF Tariff, the switching rate for Union Pacific for unit trains of certain grain commodities was \$105 per car and the switching rate

for other commodities was \$295 per car. Below is an image of the applicable language, at page 17 of Exhibit B:

ISLAND PARK, IA - Interchanged at Council Bluffs, IA	
Road	Switch Charge Per Railcar
IAIS	\$330
CPRS	\$295
UP (Note 1)	\$105
UP	\$295
Note 1 - Reciprocal Switching charges apply only on Unit Train shipments (50 railcars or greater) of the following commodities: Grain: 01131, 01135, 01139, 01132, 01133, 01137, 01139, 01144	
Industry	Address
Bunge North America Inc	19560 Bunge Ave

48. Bunge NA has shipped unit trains of grain and grain products via Union Pacific using this reciprocal switching access since at least 2006.

49. Beginning in 2024 and throughout 2025, Bunge NA awarded a significant volume of its traffic to Union Pacific. Union Pacific is expected to continue moving traffic for Bunge NA from this location in 2026.

50. The Current BNSF Tariff eliminates the switching rates for unit train grain shipments at Island Park. The effect of this change is to increase the switching rate for unit grain shipments by 281% (from \$105 to \$295). The Current BNSF Tariff was published on April 1. Below is an image of the applicable language of the Current BNSF Tariff, at page 17 of Exhibit C:

ISLAND PARK, IA - Interchanged at Council Bluffs, IA

Industry	Address
Bunge North America Inc	19560 Bunge Ave

51. On or about March 30, 2026, BNSF informed Bunge NA that it would no longer allow Union Pacific to ship unit trains to or from Bunge NA's facility. BNSF informed Bunge NA that it could continue to ship unit trains on BNSF.

52. On April 1, 2026, Union Pacific asked BNSF whether Union Pacific would be allowed to continue to ship unit trains of grain to customers at this location. On April 13, 2026, BNSF stated in writing that it would not accept unit trains for interchange for this location and instead would only interchange manifest traffic.

#### Lincoln, NE

53. The Former BNSF Tariff provided reciprocal switching access and rates for several customer facilities at Lincoln, Nebraska. Those customers include Farmers Cooperative.

54. The listed facilities are physically served by BNSF, and Union Pacific provides transportation to them through reciprocal switching. The handoff occurs in Union Pacific's LinPark yard in Lincoln.

55. Dating back to at least 2014, BNSF has listed Farmer Cooperative's facility at Lincoln as open to reciprocal switching in its switching circular. In 2022, Farmers Cooperative acquired this facility from AGP Grain Cooperative. See Exhibit A at 9.

56. Under the Former BNSF Tariff, the switching rate for Union Pacific for unit trains of certain grain commodities was \$105 per car and the switching rate

for other commodities was \$295 per car. Below is an image of the applicable language, at page 20 of Exhibit B:

LINCOLN, NE

Yankee Hill Brick Manufacturing	3705 S Coddington Ave
(a) Open only for shipments of lumber STCC 24-211	

57. Farmers Cooperative has shipped via Union Pacific using these reciprocal switching rates since at least 2022. The majority of Farmers Cooperative’s traffic via Union Pacific has been pursuant to the unit train grain rate.

58. In 2024 and 2025, Farmers Cooperative began shipping via Union Pacific in more significant volumes, with volumes more than tripling due to Union Pacific’s service offerings.

59. The Current BNSF Tariff eliminates the switching rates for unit train grain shipments at Lincoln. The effect of this change is to increase the switching rate for unit grain shipments by 281% (from \$105 to \$295). The Current BNSF Tariff was published on April 1. Below is an image of the applicable language of the Current BNSF Tariff, at page 20 of Exhibit C:

(a) Open only for shipments of lumber STCC 24-211	

60. On information and belief, on or about March 30, 2026, Farmers Cooperative was made aware that BNSF would no longer allow Union Pacific to ship unit trains to or from Farmers Cooperative’s facility. On information and belief, BNSF informed Farmers Cooperative that they could continue to ship unit trains on BNSF.

61. On April 1, 2026, Union Pacific asked BNSF whether Union Pacific would be allowed to continue to ship unit trains of grain to customers at this location. On April 13, 2026, BNSF stated in writing that it would not accept unit trains for interchange for this location and instead would only interchange manifest traffic.

Havelock, NE

62. The Former BNSF Tariff provided reciprocal switching access and rates for several customer facilities at Havelock, Nebraska. Those customers include Archer Daniel Midland Co. d/b/a ADM Processing (“ADM”).

63. The listed facilities are physically served by BNSF, and Union Pacific provides transportation to them through reciprocal switching. The handoff occurs in Union Pacific's LinPark yard in Lincoln.

64. Dating back to at least 2014, BNSF has listed ADM's facility at Havelock as open to reciprocal switching in its switching circular. See Exhibit A at 7.

65. Under the Former BNSF Tariff, the switching rate for Union Pacific for unit trains of certain grain commodities was \$105 per car and the switching rate for other commodities was \$295 per car. Below is an image of the applicable language, at page 15 of Exhibit B:

66. ADM has shipped via Union Pacific using these reciprocal switching rates since at least 2012. Much of ADM's traffic via Union Pacific is unit train traffic that was shipped pursuant to the general commodity rate.

67. In late 2025, ADM and Union Pacific entered into an agreement in which ADM awarded a significant volume of its traffic to Union Pacific. As a result, Union Pacific's share of ADM traffic is expected to grow in 2026.

68. The Current BNSF Tariff eliminates the switching rates for unit train grain shipments at Havelock. The effect of this change is to increase the switching rate for unit grain shipments by 281% (from \$105 to \$295). The Current BNSF Tariff was published on April 1. Below is an image of the applicable language of the Current BNSF Tariff, at page 15 of Exhibit C:

69. On information and belief, on or about March 31, 2026, BNSF informed ADM that it would no longer allow Union Pacific to ship unit trains to or from ADM's facility. On information and belief, BNSF informed ADM that it could continue to ship unit trains on BNSF and that it would continue to allow reciprocal switching of manifest traffic.

70. On April 1, 2026, Union Pacific asked BNSF whether Union Pacific would be allowed to continue to ship unit trains of grain to customers at this location. On April 13, 2026, BNSF stated in writing that it would not accept unit trains for interchange for this location and instead would only interchange manifest traffic.

Saginaw, TX

71. The Former BNSF Tariff provided reciprocal switching access and rates for several customer facilities at Saginaw, Texas. Those customers include Bunge USA Grain LLC (“Bunge”).

72. Bunge’s facility is physically served by BNSF, and Union Pacific provides transportation to it through reciprocal switching. The handoff occurs in the BNSF Saginaw Yard in Saginaw, Texas.

73. Dating back to at least 2014, BNSF has listed Bunge’s facility at Saginaw as open to reciprocal switching in its switching circular with a switching charge of either \$105 per car for unit train shipments of grain or soybeans, or \$295 per car for shipments of other commodities. See Exhibit A at 14.

74. Under the Former BNSF Tariff, the switching rate for unit trains of certain grain commodities was \$105 per car and the switching rate for other commodities was \$295 per car. Below is an image of the applicable language, at page 28 of Exhibit B:

Cemex Inc	3900 Angle Ave
Livestock Nutrition Center LLC	500 Burlington Rd
Trinity Industries Inc	104 E Bailey Boswell Rd
Universal Forest Products Inc	444 Sansom Blvd

78. On or about March 30, BNSF informed Bunge that it would no longer allow Union Pacific to ship unit trains to or from Bunge’s facility. BNSF informed them that it could continue to ship unit trains on BNSF.

79. On April 1, 2026, Union Pacific asked BNSF whether Union Pacific would be allowed to continue to ship unit trains of grain to customers at this location. On April 13, 2026, BNSF stated in writing that it would not accept unit trains for interchange for this location and instead would only interchange manifest traffic.

## COUNT 1

### **Unreasonable Practice – Switching Rates**

80. Union Pacific incorporates and realleges the allegations of paragraphs 1-79 of this Complaint.

81. Under 49 U.S.C. § 10702, “a rail carrier providing transportation or service subject to the jurisdiction of the Board under this part shall establish reasonable ... rules and practices on matters related to that transportation or service.”

82. It is an unreasonable practice under 49 U.S.C. § 10702 for a rail carrier to cancel a reciprocal switching tariff rate for unit train switching if one of the primary purposes of that removal is to retaliate against a competitor and/or customer for shifting business to that competitor.

83. It is an unreasonable practice under 49 U.S.C. § 10702 for a rail carrier to dramatically increase a reciprocal switching tariff if one of the primary purposes of that increase is to retaliate against a competitor and/or customer for shifting business to that competitor.

84. On information and belief, one of the primary purposes of BNSF’s Current Tariff is to retaliate against Union Pacific and certain customers for switching business to Union Pacific by foreclosing customers’ use of their switching access to Union Pacific.

85. It is an unreasonable practice under 49 U.S.C. § 10702 for a rail carrier to cancel a reciprocal switching tariff rate for unit train switching if one of the primary purposes of that removal is to foreclose a competitor from offering competitive service via that reciprocal switch.

86. It is an unreasonable practice under 49 U.S.C. § 10702 for a rail carrier to dramatically increase a reciprocal switching tariff if one of the primary purposes of that increase is to foreclose a competitor from offering competitive service via that reciprocal switch.

87. The cancellation of reciprocal switching tariff rates for unit train switching and increases to switching rates in BNSF's Current Tariff are intended to foreclose Union Pacific from offering competitive service via reciprocal switching.

88. On information and belief, the cancellation of reciprocal switching tariff rates for unit train switching in BNSF's Current Tariff is not related to or proportionate to any increase in the costs of switching, any change in operational or network needs, or any change in the market for switching services.

89. On information and belief, the dramatic increases to switching rates in BNSF's Current Tariff are not related to or proportionate to any increase in the costs of switching, any change in operational or network needs, or any change in the market for switching services.

90. The cancellation of reciprocal switching tariff rates for unit train switching and dramatic increases to switching rates in BNSF's Proposed Tariff are an unreasonable practice because the effect and intent of the changes is retaliatory

and anti-competitive, and because the changes are not rationally related to any legitimate purpose. *See* 49 U.S.C. § 10702.

91. The cancellation of reciprocal switching tariff rates for unit train switching and dramatic increases to switching rates in BNSF's Current Tariff will result in direct economic losses to Union Pacific and affected shippers and receivers, including but not limited to increased rates, lost opportunities, lost profits, and consequential damages.

92. The Board has the authority to remedy any act or omission that violates the statute, including an unreasonable practice, by awarding damages and/or injunctive relief. *See* 49 U.S.C. § 11704 (authority to award damages to remedy any "act or omission ... in violation of" the statute); 49 U.S.C. 11701 ("If the Board finds that a rail carrier is violating this part, the Board shall take appropriate action to compel compliance with this part.").

## **COUNT 2**

### **Unreasonable Practice – Refusal to Accept Unit Trains**

93. Union Pacific incorporates and realleges the allegations of paragraphs 1-92 of this Complaint.

94. Under 49 U.S.C. § 10702, "a rail carrier providing transportation or service subject to the jurisdiction of the Board under this part shall establish reasonable ... rules and practices on matters related to that transportation or service."

95. It is an unreasonable practice under 49 U.S.C. § 10702 for a rail carrier to issue a tariff that is misleading.

96. It is an unreasonable practice under 49 U.S.C. § 10702 for a rail carrier to refuse to switch certain types of traffic that are permitted in its switching tariff.

97. The general rules of BNSF's switching tariff specify the type of traffic that it will and will not switch. That tariff specifies that BNSF will not switch locomotives, maintenance cars, passenger cars, bi-levels, and tri-levels. Unit trains are not excluded.

98. Where the general rules do not exclude certain type of traffic, a tariff may nonetheless exclude certain types of traffic or commodity by location in the notes. *See, e.g.*, Exhibit C at 20 (limiting by STCC), 36 (limiting by origin). The Current BNSF Tariff does not state that BNSF will not accept unit train traffic at individual locations.

99. On information and belief, BNSF has informed certain customers that notwithstanding the tariff, BNSF will not allow Union Pacific to ship unit trains to or from these customer facilities. This apparent prohibition is not reflected in the Current BNSF Tariff. *See* Exhibit C, Section 1 (stating general rules); *id.* at 15, 17, 20, 28 (unit train shipments not listed as exclusions for Hastings, Havelock, Island Park, Lincoln, or Saginaw). BNSF will continue to allow customers at these facilities to ship unit trains on BNSF.

100. On information and belief, one of the primary purposes of refusing to accept unit train traffic for reciprocal switching is to retaliate against Union Pacific

and certain customers for switching business to Union Pacific by foreclosing customers' use of their switching access to Union Pacific.

101. BNSF's decision to stop accepting unit train traffic for switching despite its switching tariff makes that tariff misleading.

102. BNSF's decision to stop accepting unit train traffic for switching despite its switching tariff is intended to foreclose Union Pacific from offering competitive service via reciprocal switching

103. The refusal to accept unit train traffic will result in direct economic losses to Union Pacific and affected shippers and receivers, including but not limited to increased rates, lost opportunities, lost profits, and consequential damages.

104. BNSF's refusal to accept unit trains from Union Pacific is contrary to the terms of the Current BNSF Tariff and an unreasonable practice.

105. The Board has the authority to remedy any act or omission that violates the statute, including an unreasonable practice, by awarding damages and/or injunctive relief. *See* 49 U.S.C. § 11704 (authority to award damages to remedy any "act or omission ... in violation of" the statute); 49 U.S.C. 11701 ("If the Board finds that a rail carrier is violating this part, the Board shall take appropriate action to compel compliance with this part.").

### COUNT 3

#### **Prescription of Reciprocal Switching for Anticompetitive Conduct**

106. Complainants incorporate and reallege the allegations of paragraphs 1-105 of this Complaint.

107. Under 49 U.S.C. § 11102(c) and the Board's related regulations at 49 C.F.R. Part 1144, the Board is authorized to prescribe a reciprocal switching arrangement where the Board determines that such prescription "is necessary to remedy or prevent an act that is contrary to the competition policies of 49 U.S.C. 10101 or is otherwise anticompetitive, and otherwise satisfies the criteria of 49 U.S.C. ... 11102(c) ...." 49 C.F.R. § 1144.2(a).

108. Multiple customer facilities identified in the allegations above as being affected by the changes to BNSF's Switching Book and BNSF's refusal to accept unit trains for switching are located within a terminal area, including the facilities located in Saginaw, TX; Lincoln, NE; and Island Park, IA ("Affected Terminal Customers"). *See* 49 U.S.C. § 11102(c).

109. The prescription of reciprocal switching for Affected Terminal Customers is necessary to provide competitive rail service. *See* 49 U.S.C. § 11102(c).

110. The prescription of reciprocal switching for Affected Terminal Customers is necessary to remedy or prevent an act that is contrary to the competition policies of 49 U.S.C. 10101 or is otherwise anticompetitive and otherwise satisfies the criteria of 49 U.S.C. § 11102(c). *See* 49 C.F.R. § 1144.2(a)(1).

111. BNSF's cancellation of reciprocal switching tariff rates for unit train switching and significant increase to the switching rates for Affected Terminal Customers was not tied to any increase in the costs of switching or legitimate changes in the market.

112. BNSF's cancellation of reciprocal switching tariff rates for unit train switching and significant increase to the switching rates for Affected Terminal Customers was imposed in retaliation for the customers' utilization of Union Pacific.

113. BNSF's cancellation of reciprocal switching tariff rates for unit train switching and significant increase to the switching rates for Affected Terminal Customers was imposed with the intent of making reciprocal switching to Union Pacific uneconomical.

114. BNSF's cancellation of reciprocal switching tariff rates for unit train switching and significant increase to the switching rates for Affected Terminal Customers is contrary to the competition policies of the Interstate Commerce Act.

115. The prescription of reciprocal switching for Affected Terminal Customers is necessary to remedy BNSF's anticompetitive acts.

116. Union Pacific has historically used these switches to serve the Affected Terminal Customers. Union Pacific would use the reciprocal switching sought herein for a significant amount of traffic. *See* 49 C.F.R. § 1144.2(a)(2)(ii).

117. Union Pacific sought to engage BNSF in negotiations to resolve this dispute at least 5 days prior to filing this Complaint. *See* 49 C.F.R. § 1144.1(a).

## REQUESTS FOR RELIEF

WHEREFORE, Union Pacific respectfully requests the Board (1) enter an order finding the changes in the Proposed Tariff to be unlawful and an unreasonable practice; (2) enter an order finding BNSF's refusal to accept unit train traffic in contravention of its tariff to be unlawful and an unreasonable practice; (3) enter an order finding that a switching order is necessary for competitive rail service and prescribing reciprocal switching at Affected Terminal Customers; and (4) enter an order imposing appropriate remedies. Those remedies may include:

- An award of damages and reparations to parties harmed by the Proposed Tariff and the refusal to accept unit train traffic, including Union Pacific and affected shippers and receivers (*see* 49 U.S.C. § 11704; *see also* 49 U.S.C. § 1306). Such damages may include lost profits, increased costs, consequential damages, and damages from business disruption;
- An order requiring restoration of unit train service reciprocal switching rates at all locations where the Current Tariff removed those rates (*see* 49 U.S.C. § 11701);
- An order requiring cancellation of all rate increases made in the Current Tariff and restoration of the Former Tariff rates (*see* 49 U.S.C. § 11701);
- An order prescribing reciprocal switching at Affected Terminal Customers and where a switching order is necessary for competitive rail service within the meaning of 49 U.S.C. § 11102(c);
- If necessary after negotiations, an order prescribing rates for Affected Terminal Customers with prescribed switching (*see* 49 U.S.C. § 11102(c)(1)); and
- Such other actions as may be reasonable and necessary.

Respectfully submitted,

/s/ Matthew J. Warren

Issued: July 1, 2014

Effective: July 21, 2014

Changes: Page 4

# BNSF Switching Book 8005-D

## Section 1: General Rules & Definitions

### **1. APPLICATION OF RECIPROCAL SWITCHING CHARGES**

Reciprocal Switching is an interline switch that involves the movement of a loaded railcar from an industry located on one rail carrier to the point of interchange with a connecting linehaul carrier or vice versa, where:

The movement occurs within the switch limits of the same station;

The rail carrier performing the movement is operating as a switch carrier;

The plant or industry is open, by tariff or special agreement, to the connecting linehaul carrier; and

The switch charge assessed by the switch carrier against the connecting linehaul carrier for handling the loaded railcar includes the handling of the empty railcar in the reverse direction, when applicable.

When BNSF does not participate in the line-haul movement of the shipment, BNSF will provide Reciprocal Switching to or from those specific industries listed in Section 2, subject to limitations or restrictions as noted.

BNSF does not provide Reciprocal Switching on:

Shipments to or from Team tracks or Leased tracks

Shipments not moving in revenue line-haul service

Railway equipment, empty, moving on own wheels, including:

Rail railcars (STCC 37-422) not in revenue service

Locomotives or Tenders (STCC 37-411)

Maintenance or Repair railcars (STCC 37-424)

Passenger Train railcars (STCC 37-421)

Street railcars or self-propelled railroad railcars (STCC 37-423)

Shipments moving in Automax, bi-level or tri-level railcars

Reciprocal Switching charges listed in Section 2 of this tariff are billed to the line-haul rail carrier handling the loaded railcar from or to the station at which the reciprocal switch occurs and apply regardless of whether or not the Reciprocal Switching charges are absorbed in whole or in part by the line-haul rail carrier.

Reciprocal Switching charges will apply for the handling of loaded railcars one direction and empty railcars in the reverse direction. If railcars are moved empty in both directions, then charges for a one-way movement will apply. If railcars are moved empty in one direction and are not returned, charges will apply as if the railcars had been loaded, and switching of other loaded railcars will not be considered as offsetting for the one-way movement of empty railcars. If railcars move loaded in both directions, applicable Reciprocal Switching charges will be assessed for each loaded movement.

Railcars delivered for Reciprocal Switching in violation of any restriction will be subject to BNSF line-haul charges.

### **2. INTER-TERMINAL SWITCHING**

Inter-Terminal Switching is an interline switch that involves the movement of a loaded railcar from an industry located on one rail carrier to an industry located on another rail carrier when both industries are located within the switch limits of the same station. BNSF's Inter-Terminal Switching charge is \$400 per railcar, loaded or empty.

Charges for Inter-Terminal Switching are assessed to the customer ordering the switch, when such switch originates on BNSF. For inter-terminal switch movements received from another rail carrier, BNSF will collect the Inter-Terminal Switching charge from the rail carrier originating the movement.

### **3. INTRA-TERMINAL SWITCHING**

Intra-Terminal switching is a non-interline switch that involves the movement of a railcar, loaded or empty, from one track to another track located on the same rail carrier (other than an intra-plant switch) within the switch limits of the same station. BNSF's Intra-Terminal Switching charge is \$400 per railcar, loaded or empty.

Charges for Intra-Terminal Switching are assessed to the customer that requested the switch by the rail carrier performing the switch.

### **4. INTRA-PLANT SWITCHING**

Intra-Plant Switching is a non-interline switch that involves the movement of a car, loaded or empty, from one track to another track, or between two points on the same track, within the switch confines of the same industry. BNSF's Intra-Plant Switching charge is \$150 per railcar, loaded or empty.

Charges for Intra-Plant Switching are assessed to the customer switched by the rail carrier performing the switch.

### **5. INTERMEDIATE SWITCHING**

Intermediate Switching is an interline switch that involves the movement of a railcar, loaded or empty, from the interchange track of one connecting rail carrier to the interchange track of another connecting rail carrier within the switch limits of the same station, where the switch carrier neither originates or terminates the shipment nor receives linehaul revenue. BNSF's Intermediate Switching charge is \$400 per railcar, loaded or empty.

Exception: BNSF's Intermediate Switching charge at Enid, Oklahoma is \$160 per railcar, loaded or empty.

### **6. INTERMEDIATE CARRIER'S SWITCH CHARGE**

Except as otherwise provided, when the interchange between BNSF and the line-haul rail carrier is effected by an intermediate rail carrier, applicable published charges assessed against BNSF by the intermediate carrier for the switch movement of a loaded railcar from or to the connecting line-haul carrier or for the return of an empty railcar to the line-haul carrier will be in addition to the applicable BNSF Reciprocal Switching charge.

# BNSF Switching Book 8005-D

## Section 1: General Rules & Definitions

### 7. CHARGES FOR SWITCHING PRIVATELY OWNED RAILWAY PASSENGER RAILCARS

BNSF will switch privately owned railway passenger railcars at a charge of \$700 per railcar. This charge will apply on Intermediate, Inter-Terminal, Intra-Terminal and Intra-Plant Switching movements. When delivered to a connecting rail carrier for line-haul movement, this charge will be in addition to the line-haul charges.

Charges for Intra-Terminal, Intra-Plant, and Inter-Terminal Switching originating on BNSF will be billed to the party ordering the switch. Charges for Intermediate Switching and Inter-terminal Switching terminating on BNSF will be collected from the rail carrier from which the movement is received.

### 8. CHARGES FOR SWITCHING RAILROAD COMPANY MATERIAL RAILCARS

Articles of railroad company material such as railcars, locomotives, rails, or scrap iron or steel articles, being disposed of by connecting rail carriers and moving on non-revenue billing via such owner lines to a point of connection with the BNSF for subsequent movement on switch billing to a BNSF industry at the same station, will be subject to the charges published in this tariff for reciprocal switching service.

### 9. INTERCHANGE TRAFFIC WITH FXE AT EL PASO

For carload traffic interchanging to or from the FXE at El Paso, TX moving to or from BNSF industries or tracks in El Paso, TX the charge will be \$400.

### 10. DEMURRAGE AND STORAGE

All railcars switched under the provisions of this Book are subject to BNSF Demurrage Rules Book 6004-series.

### 11. TEAM TRACK

A Team Track is a track assigned by BNSF for use of the general public. Unless otherwise provided, all BNSF Team Tracks are closed to reciprocal switching.

### 12. LINE-HAUL

Line-haul is the movement of railcars between stations that are not located within the switching limits of the same station, as published in the OPSL 6000-series.

### 13. INTERCHANGE ERRORS

When railcar(s), empty or loaded, are received from a connecting rail carrier in error or without necessary forwarding instructions and BNSF returns the railcar(s) to the delivering rail carrier, a charge of \$400 per railcar, except as otherwise provided below, may be assessed against the rail carrier interchanging the railcar(s) to BNSF.

RAILROAD	CHARGE PER RAILCAR	RAILROAD	CHARGE PER RAILCAR	RAILROAD	CHARGE PER RAILCAR	RAILROAD	CHARGE PER RAILCAR	RAILROAD	CHARGE PER RAILCAR
ARZC	\$565.00	FWWR	\$370.00	LDRR	\$500.00	PSAP	\$475.00	TCRY	\$375.00
BDW	\$300.00	GCW	\$350.00	LRWN	\$500.00	PSR	\$300.00	TCWR	\$300.00
BJRY	\$330.00	GNWR	\$255.00	MMT	\$155.00	PT	\$325.00	TMBL	\$320.00
CCTR	\$250.00	GVSR	\$147.00	MNA	\$370.00	RJCK	\$500.00	TXPF	\$350.00
CN	\$435.00	GWR	\$500.00	MNNR	\$100.00	RPRC	\$100.00	TXNW	\$300.00
CPRS	\$435.00	IAIS	\$350.00	NKCR	\$250.00	RVPR	\$125.00	TXR	\$300.00
CSCD	\$475.00	IANR	\$475.00	NL	\$166.00	SCRR	\$165.00	WTLC	\$200.00
CRL	\$350.00	IR	\$250.00	OTVR	\$390.00	SLWC	\$150.00	YVR	\$275.00
CW	\$218.50	KCTL	\$200.00	PAL	\$500.00	SJVR	\$475.00		
DNR	\$100.00	KCS	\$241.00	PHL	\$381.07	SR	\$210.00		
EJE	\$435.00	KFR	\$150.00	PNR	\$500.00	SRY	\$210.00		

When BNSF elects to forward an interchange error movement to the proper rail carrier within the same switching district, intermediate charges will be assessed in accordance with this book against the delivering rail carrier.

Unless otherwise provided, when loaded or empty railcar(s) are received from a connecting rail carrier in error or without necessary forwarding instructions and BNSF performs line-haul service or when railcars are received at the incorrect interchange location moving in line-haul service (including Run-Through Train Service), such movements will be subject to a charge of \$3 per mile (\$300 minimum per railcar, \$150 minimum per TOFC/COFC\*\* unit) to the erring rail carrier to return the railcar(s) to the original interchange point (round trip) or to a subsequent interchange point or destination customer. Forwarding instructions (EDI 404, 417, 418) that contain erroneous information received from another rail carrier that cause additional line-haul movement of traffic, are subject to the same charges.

BNSF will not be liable for any setback, switching or line-haul charges assessed by another rail carrier resulting from a billing error or an interchange error of another rail carrier.

When railcars are received in interchange and are returned for mechanical or safety reasons, BNSF will assess the same charge as an interchange error movement.

In the event BNSF receives a railcar for Reciprocal Switching to a closed customer, BNSF will assess an additional \$2,200 per railcar against the rail carrier from whom the railcar was received.

(\* TOFC - Trailer on Flatcar, COFC = Container on Flatcar)

## Section 3: Notes

### Note 1

Reciprocal Switching charges apply only on Unit Train shipments (50 railcars or greater) of the following commodities:

01-131 (Barley)	01-135 (Rye)	01-139 (Grain, nec)
01-132 (Corn)	01-136 (Sorghum)	01-144 (Soybeans)
01-133 (Oats)	01-137 (Wheat)	

### Note 2

Reciprocal Switching charges apply only on the following commodities:

01-131 (Barley)	01-137 (Wheat)	20-419 (Flour)	20-939 (Oilseed)
01-132 (Corn)	01-139 (Grain, nec)	20-421 (Prepared Feed)	20-941 (Marine Oil Mill)
01-133 (Oats)	01-144 (Soybeans)	20-451 (Prepared Flour)	20-942 (Marine Oil Mill )
01-135 (Rye)	20-416 (Oat Flour)	20-452 (Prepared Flour Mix)	20-961 (Shortening)
01-136 (Sorghum)	20-418 (Grain Mill)	20-933 (Oil, Nuts)	50-011 (Cotton Seed)

### Note 3

Reciprocal Switching charges apply only on the following commodities:

01-141 (Cotton Seed)	01-199 (Field Crop)	20-413 (Corn Meal)	20-832 (Malt Flour)
01-142 (Flaxseed)	01-341 (Beans, Dry)	20-414 (Rye Flour)	20-839 (Malt Products)
01-149 (Oil Kennels)	01-342 (Dry Peas)	20-465 (Corn Oil)	20-859 (By products)
01-151 (Grass Seeds)	01-343 (Cow Peas)	20-467 (Wet Processed Corn)	20-911 (Cottonseed Oil)
01-152 (Popcorn)	01-991 (Hay/Straw)	20-469 (Wet Processed Corn)	20-914 (Cottonseed Meal)
01-159 (Seeds)	01-992 (Alfalfa)	20-619 (Sugar Mill)	20-921 (Soybean Oil)
01-191 (Fodder)	20-411 (Wheat Flour)	20-823 (Malt Extract)	20-923 (Soybean Meal)
01-196 (Straw)	20-412 (Wheat Bran)	20-831 (Malt)	20-931 (Linseed Oil)

### Note 4

Reciprocal Switching charges apply only on STCC 24 (Lumber and Wood Products), excluding STCC 24-115 (Chips); STCC 26 (Pulp and Paper Products), 32-719 (Manufactured Products) and 32-754 (Panel Products)

### Note 5

Reciprocal Switching charges apply only on STCC 11-000 thru 11-221 (Coal)

### Note 6

Reciprocal Switching charges apply only on STCC 40-211 (Waste or Scrap Materials)

### Note 7

Reciprocal Switching charges apply on all commodities except STCC 01-133 (Oats) and STCC 01-135 (Rye)

### Note 8

Reciprocal Switching charges apply only on STCC 01-133 (Oats) and STCC 01-135 (Rye)

### Note 9

Reciprocal Switching charges apply only on STCC 24-211 (Lumber and Wood Products)

### Note 10

Reciprocal Switching charges apply on all commodities except STCC 33-122, 33-124, 33-125 (Metal Products) in BNSF-owned or -leased gondola cars with Mechanical Designation of "GB" or "GBS"

### Note 11

Reciprocal Switching charges apply on all commodities except STCC 11-000 thru 11-221 (Coal)

**EXHIBIT B**

# BNSF Switching Book 8005-E

Issued: March 23, 2026

Effective: March 24, 2026

Changes: Pages 9, 19, 26, 28-29, 32, 35

## Section 1: General Rules & Definitions

### 1. RECIPROCAL SWITCHING

A Reciprocal Switch is an interline switch that involves the movement of a loaded railcar from an industry located on one rail carrier to the point of interchange with a connecting linehaul carrier or vice versa, where:

- The movement occurs within the switch limits of the same station;
- The rail carrier performing the movement is operating as a switch carrier;
- The plant or industry is open, by tariff or special agreement, to the connecting linehaul carrier; and
- The switch charge assessed by the switch carrier against the connecting linehaul carrier for handling the loaded railcar includes the handling of the empty railcar in the reverse direction, when applicable.

When BNSF does not participate in the linehaul movement of the shipment, BNSF will provide Reciprocal Switching to or from those specific industries listed in Section 2, subject to limitations or restrictions as noted. If there is a change in those industries listed in Section 2 (name change, change in business, change in ownership, inactive rail service, close, etc.), BNSF will review their open industry status and reserves the right to remove their open to reciprocal switching industry status from Section 2. For BNSF served industries not listed in Section 2, BNSF provides linehaul service with BNSF pricing and these industries are considered closed to reciprocal switching. New industries which locate on BNSF will be closed to reciprocal switching unless BNSF voluntarily agrees to open them to other carriers.

BNSF does not provide Reciprocal Switching on:

- Shipments to or from Team tracks or Leased tracks
- Shipments not moving in revenue linehaul service
- Railway equipment, empty, moving on own wheels, including:
  - Rail railcars (STCC 37-422) not in revenue service
  - Locomotives or Tenders (STCC 37-411)
  - Maintenance or Repair railcars (STCC 37-424)
  - Passenger Train railcars (STCC 37-421)
  - Street railcars or self-propelled railroad railcars (STCC 37-423)
- Shipments of Containers or Trailers
- Shipments moving in Automax, bi-level or tri-level railcars

Reciprocal Switch charges listed in Section 2 of this publication are billed to the linehaul rail carrier handling the loaded railcar from or to the station at which the reciprocal switch occurs and apply regardless of whether or not the Reciprocal Switch charges are absorbed in whole or in part by the linehaul rail carrier.

Reciprocal Switch charges will be assessed for the handling of loaded rail cars in one direction, and the charge assessed will include the movement of the same empty railcars in the reverse direction. If railcars move loaded in both directions, applicable Reciprocal Switch charges will be assessed for each loaded movement.

Railcars delivered for Reciprocal Switching in violation of any restriction will be subject to BNSF linehaul charges.

### 2. INTER-TERMINAL SWITCHING

An Inter-Terminal Switch is an interline switch that involves the movement of a loaded railcar from an industry located on one rail carrier to an industry located on another rail carrier when both industries are located within the switch limits of the same station. BNSF's Inter-Terminal Switch charge is \$545 per loaded railcar.

When the loaded railcar originates on BNSF, Inter-Terminal Switch charges will be assessed to the customer ordering the switch. Charges assessed will include BNSF's Inter-terminal Switch charge as well as the destination switch carrier's applicable charge.

When BNSF receives the loaded railcar from another rail carrier, BNSF will collect the Inter-Terminal Switch charge from the rail carrier that originated the loaded movement.

### 3. INTRA-TERMINAL SWITCHING

An Intra-Terminal Switch is a non-interline switch that involves the movement of a railcar, loaded or empty, from one track to another track located on the same rail carrier (other than an intra-plant switch) within the switch limits of the same station. BNSF's Intra-Terminal Switch charge is \$545 per railcar, loaded or empty.

Intra-Terminal Switch charges will be assessed to the customer that requested the switch by the rail carrier performing the switch.

### 4. INTRA-PLANT SWITCHING

An Intra-Plant Switch is a non-interline switch that involves the movement of a car, loaded or empty, from one track to another track, or between two points on the same track, within the switch confines of the same industry. BNSF's Intra-Plant Switch charge is \$220 per railcar, loaded or empty.

Intra-Plant Switch charges will be assessed to the customer switched by the rail carrier performing the switch.

### 5. INTERMEDIATE SWITCHING

An Intermediate Switch is an interline switch that involves the movement of a railcar, loaded or empty, from the interchange track of one connecting rail carrier to the interchange track of another connecting rail carrier within the switch limits of the same station, where the switch carrier neither originates or terminates the shipment nor receives linehaul revenue. BNSF's Intermediate Switch charge is \$545 per railcar, loaded or empty.

### 6. INTERMEDIATE CARRIER'S SWITCH CHARGE

Except as otherwise provided, when the interchange between BNSF and the linehaul rail carrier is effected by an intermediate switch carrier, applicable published charges assessed against BNSF by the intermediate switch carrier for the movement of a loaded railcar to the connecting linehaul carrier, or for the return of an empty railcar to the linehaul carrier, will be in addition to the applicable BNSF Reciprocal Switch charge.

## Section 1: General Rules & Definitions

### 7. CHARGES FOR SWITCHING PRIVATELY OWNED RAILWAY PASSENGER RAILCARS

BNSF will switch privately owned railway passenger railcars at a charge of \$910 per railcar. This charge will apply on Intermediate, Inter-Terminal, Intra-Terminal and Intra-Plant Switching movements. When delivered to a connecting rail carrier for linehaul movement, this charge will be in addition to the linehaul charges.

Charges for Intra-Terminal, Intra-Plant, and Inter-Terminal Switching originating on BNSF will be billed to the party ordering the switch. Charges for Intermediate Switching and Inter-terminal Switching terminating on BNSF will be collected from the rail carrier from which the movement is received.

### 8. CHARGES FOR SWITCHING RAILROAD COMPANY MATERIAL RAILCARS

Articles of railroad company material such as railcars, locomotives, rails, or scrap iron or steel articles, being disposed of by connecting rail carriers and moving on non-revenue billing via such owner lines to a point of connection with the BNSF for subsequent movement on switch billing to a BNSF industry at the same station, will be subject to the charges published in this tariff for reciprocal switching service.

### 9. THIS ITEM WAS INTENTIONALLY REMOVED

### 10. DEMURRAGE AND STORAGE

All railcars switched under the provisions of this Book are subject to BNSF Demurrage Rules Book 6004-series.

### 11. TEAM TRACK

A Team Track is a track assigned by BNSF for use of the general public. Unless otherwise provided, all BNSF Team Tracks are closed to reciprocal switching.

### 12. LINEHAUL

Linehaul is the movement of railcars between stations that are not located within the switch limits of the same station, as published in the OPPL 6000-series.

### 13. INTERCHANGE ERRORS

When railcar(s), empty or loaded, are received from a connecting rail carrier in error or without necessary forwarding instructions and BNSF returns the railcar(s) to the delivering rail carrier, a setback charge of \$400 per railcar, except as otherwise provided below, may be assessed against the rail carrier interchanging the railcar(s) to BNSF.

RAILROAD	CHARGE PER RAILCAR	RAILROAD	CHARGE PER RAILCAR	RAILROAD	CHARGE PER RAILCAR	RAILROAD	CHARGE PER RAILCAR	RAILROAD	CHARGE PER RAILCAR

DGNO	\$500.00	KJRY	\$650.00	PSAP	\$500.00	SSP	\$500.00		

When BNSF elects to forward an interchange error movement to the proper rail carrier within the same switch district, intermediate charges will be assessed in accordance with this book against the delivering rail carrier.

Unless otherwise provided, when a loaded or empty railcar/TOFC/COFC is received from a connecting rail carrier in error or without necessary forwarding instructions and BNSF performs linehaul service, or when a loaded or empty railcar/TOFC/COFC is received at the incorrect interchange location moving in linehaul service (including Run-Through Train Service), such movements will be subject to a charge of \$3 per mile per railcar (\$300 minimum per railcar) and \$1.50 per mile per TOFC/COFC\*\* (\$150 minimum per TOFC/COFC) billable to the erring rail carrier to return the railcar/TOFC/COFC to the original interchange point (round trip) or to a subsequent interchange point or destination customer. Forwarding instructions (EDI 404, 417, 418) that contain erroneous information received from another rail carrier that cause additional linehaul movement of traffic are subject to the same charges. This \$3 per mile per railcar and \$1.50 per mile per TOFC/COFC charge is in addition to the setback charge of \$400 per railcar listed above and only applies to the miles transported outside of the originating switch limits.

BNSF will not be liable for any setback, switching or linehaul charges assessed by another rail carrier resulting from a billing error or an interchange error of another rail carrier.

When railcars are received in interchange and are returned for mechanical or safety reasons, BNSF will assess the same charge as an interchange error movement.

In the event that BNSF handles a railcar in interchange in connection with a customer that is not open to Reciprocal Switching and BNSF was not indicated as a linehaul carrier in the route on the bill of lading, BNSF will assess a charge of \$2,200 against the carrier that received the bill of lading from the customer. Said charge will be in addition to any other applicable charge(s).

(\*\* TOFC - Trailer on Flatcar, COFC = Container on Flatcar)

### 14. CTA INTERSWITCHING

For information on CTA interswitching in Canada, including regulations and fees, please visit Transport Canada's web site, at <http://laws.justice.gc.ca/eng/regulations/sor-88-41/page-1.html#docCont>

### 15. SWITCHING OF EMPTY CARS

If an empty railcar is switched from another rail carrier to a BNSF industry or track, or vice versa, and the empty movement is not in conjunction with a loaded movement involving the same railcar (reciprocal switch or inter-terminal switch), the customer ordering the switch of the empty railcar will be assessed a charge of \$545 per railcar. The switching of another loaded railcar will not be considered as an offsetting movement.

## Section 2: Industries and Charges

Industries are listed in alphabetical order by rail station and are open to reciprocal switch via junction at that station unless otherwise noted.

**BNSF Switching Book 8005-D (effective May 1, 2026)**

# BNSF Switching Book 8005-E

Issued: April 1, 2026

Effective: May 1, 2026

Changes: Pages 3 - 37

## Section 1: General Rules & Definitions

### 1. RECIPROCAL SWITCHING

A Reciprocal Switch is an interline switch that involves the movement of a loaded railcar from an industry located on one rail carrier to the point of interchange with a connecting linehaul carrier or vice versa, where:

- The movement occurs within the switch limits of the same station;
- The rail carrier performing the movement is operating as a switch carrier;
- The plant or industry is open, by tariff or special agreement, to the connecting linehaul carrier; and
- The switch charge assessed by the switch carrier against the connecting linehaul carrier for handling the loaded railcar includes the handling of the empty railcar in the reverse direction, when applicable.

When BNSF does not participate in the linehaul movement of the shipment, BNSF will provide Reciprocal Switching to or from those specific industries listed in Section 2, subject to limitations or restrictions as noted. If there is a change in those industries listed in Section 2 (name change, change in business, change in ownership, inactive rail service, close, etc.), BNSF will review their open industry status and reserves the right to remove their open to reciprocal switching industry status from Section 2. For BNSF served industries not listed in Section 2, BNSF provides linehaul service with BNSF pricing and these industries are considered closed to reciprocal switching. New industries which locate on BNSF will be closed to reciprocal switching unless BNSF voluntarily agrees to open them to other carriers.

BNSF does not provide Reciprocal Switching on:

- Shipments to or from Team tracks or Leased tracks
- Shipments not moving in revenue linehaul service
- Railway equipment, empty, moving on own wheels, including:
  - Rail railcars (STCC 37-422) not in revenue service
  - Locomotives or Tenders (STCC 37-411)
  - Maintenance or Repair railcars (STCC 37-424)
  - Passenger Train railcars (STCC 37-421)
  - Street railcars or self-propelled railroad railcars (STCC 37-423)
- Shipments of Containers or Trailers
- Shipments moving in Automax, bi-level or tri-level railcars

Reciprocal Switch charges listed in Section 2 of this publication are billed to the linehaul rail carrier handling the loaded railcar from or to the station at which the reciprocal switch occurs and apply regardless of whether or not the Reciprocal Switch charges are absorbed in whole or in part by the linehaul rail carrier.

Reciprocal Switch charges will be assessed for the handling of loaded rail cars in one direction, and the charge assessed will include the movement of the same empty railcars in the reverse direction. If railcars move loaded in both directions, applicable Reciprocal Switch charges will be assessed for each loaded movement.

Railcars delivered for Reciprocal Switching in violation of any restriction will be subject to BNSF linehaul charges.

### 2. INTER-TERMINAL SWITCHING

An Inter-Terminal Switch is an interline switch that involves the movement of a loaded railcar from an industry located on one rail carrier to an industry located on another rail carrier when both industries are located within the switch limits of the same station. BNSF's Inter-Terminal Switch charge is \$545 per loaded railcar.

When the loaded railcar originates on BNSF, Inter-Terminal Switch charges will be assessed to the customer ordering the switch. Charges assessed will include BNSF's Inter-terminal Switch charge as well as the destination switch carrier's applicable charge.

When BNSF receives the loaded railcar from another rail carrier, BNSF will collect the Inter-Terminal Switch charge from the rail carrier that originated the loaded movement.

### 3. INTRA-TERMINAL SWITCHING

An Intra-Terminal Switch is a non-interline switch that involves the movement of a railcar, loaded or empty, from one track to another track located on the same rail carrier (other than an intra-plant switch) within the switch limits of the same station. BNSF's Intra-Terminal Switch charge is \$545 per railcar, loaded or empty.

Intra-Terminal Switch charges will be assessed to the customer that requested the switch by the rail carrier performing the switch.

### 4. INTRA-PLANT SWITCHING

An Intra-Plant Switch is a non-interline switch that involves the movement of a car, loaded or empty, from one track to another track, or between two points on the same track, within the switch confines of the same industry. BNSF's Intra-Plant Switch charge is \$220 per railcar, loaded or empty.

Intra-Plant Switch charges will be assessed to the customer switched by the rail carrier performing the switch.

### 5. INTERMEDIATE SWITCHING

An Intermediate Switch is an interline switch that involves the movement of a railcar, loaded or empty, from the interchange track of one connecting rail carrier to the interchange track of another connecting rail carrier within the switch limits of the same station, where the switch carrier neither originates or terminates the shipment nor receives linehaul revenue. BNSF's Intermediate Switch charge is \$545 per railcar, loaded or empty.

### 6. INTERMEDIATE CARRIER'S SWITCH CHARGE

Except as otherwise provided, when the interchange between BNSF and the linehaul rail carrier is effected by an intermediate switch carrier, applicable published charges assessed against BNSF by the intermediate switch carrier for the movement of a loaded railcar to the connecting linehaul carrier, or for the return of an empty railcar to the linehaul carrier, will be in addition to the applicable BNSF Reciprocal Switch charge.

### 7. CHARGES FOR SWITCHING PRIVATELY OWNED RAILWAY PASSENGER RAILCARS

BNSF will switch privately owned railway passenger railcars at a charge of \$910 per railcar. This charge will apply on Intermediate, Inter-Terminal, Intra-Terminal and Intra-Plant Switching movements. When delivered to a connecting rail carrier for linehaul movement, this charge will be in addition to the linehaul charges.

## Section 1: General Rules & Definitions

Charges for Intra-Terminal, Intra-Plant, and Inter-Terminal Switching originating on BNSF will be billed to the party ordering the switch. Charges for Intermediate Switching and Inter-terminal Switching terminating on BNSF will be collected from the rail carrier from which the movement is received.

### 8. CHARGES FOR SWITCHING RAILROAD COMPANY MATERIAL RAILCARS

Articles of railroad company material such as railcars, locomotives, rails, or scrap iron or steel articles, being disposed of by connecting rail carriers and moving on non-revenue billing via such owner lines to a point of connection with the BNSF for subsequent movement on switch billing to a BNSF industry at the same station, will be subject to the charges published in this tariff for reciprocal switching service.

### 9. THIS ITEM WAS INTENTIONALLY REMOVED

### 10. DEMURRAGE AND STORAGE

All railcars switched under the provisions of this Book are subject to BNSF Demurrage Rules Book 6004-series.

### 11. TEAM TRACK

A Team Track is a track assigned by BNSF for use of the general public. Unless otherwise provided, all BNSF Team Tracks are closed to reciprocal switching.

### 12. LINEHAUL

Linehaul is the movement of railcars between stations that are not located within the switch limits of the same station, as published in the OPSL 6000-series.

### 13. INTERCHANGE ERRORS

When railcar(s), empty or loaded, are received from a connecting rail carrier in error or without necessary forwarding instructions and BNSF returns the railcar(s) to the delivering rail carrier, a setback charge of \$400 per railcar, except as otherwise provided below, may be assessed against the rail carrier interchanging the railcar(s) to BNSF.

RAILROAD	CHARGE PER RAILCAR	RAILROAD	CHARGE PER RAILCAR	RAILROAD	CHARGE PER RAILCAR	RAILROAD	CHARGE PER RAILCAR	RAILROAD	CHARGE PER RAILCAR

When BNSF elects to forward an interchange error movement to the proper rail carrier within the same switch district, intermediate charges will be assessed in accordance with this book against the delivering rail carrier.

Unless otherwise provided, when a loaded or empty railcar/TOFC/COFC is received from a connecting rail carrier in error or without necessary forwarding instructions and BNSF performs linehaul service, or when a loaded or empty railcar/TOFC/COFC is received at the incorrect interchange location moving in linehaul service (including Run-Through Train Service), such movements will be subject to a charge of \$3 per mile per railcar (\$300 minimum per railcar) and \$1.50 per mile per TOFC/COFC\*\* (\$150 minimum per TOFC/COFC) billable to the erring rail carrier to return the railcar/TOFC/COFC to the original interchange point (round trip) or to a subsequent interchange point or destination customer. Forwarding instructions (EDI 404, 417, 418) that contain erroneous information received from another rail carrier that cause additional linehaul movement of traffic are subject to the same charges. This \$3 per mile per railcar and \$1.50 per mile per TOFC/COFC charge is in addition to the setback charge of \$400 per railcar listed above and only applies to the miles transported outside of the originating switch limits.

BNSF will not be liable for any setback, switching or linehaul charges assessed by another rail carrier resulting from a billing error or an interchange error of another rail carrier.

When railcars are received in interchange and are returned for mechanical or safety reasons, BNSF will assess the same charge as an interchange error movement.

In the event that BNSF handles a railcar in interchange in connection with a customer that is not open to Reciprocal Switching and BNSF was not indicated as a linehaul carrier in the route on the bill of lading, BNSF will assess a charge of \$2,200 against the carrier that received the bill of lading from the customer. Said charge will be in addition to any other applicable charge(s).

(\*\* TOFC - Trailer on Flatcar, COFC = Container on Flatcar)

### 14. CTA INTERSWITCHING

For information on CTA interswitching in Canada, including regulations and fees, please visit Transport Canada's web site, at <http://laws.justice.gc.ca/eng/regulations/sor-88-41/page-1.html#docCont>

### 15. SWITCHING OF EMPTY CARS

If an empty railcar is switched from another rail carrier to a BNSF industry or track, or vice versa, and the empty movement is not in conjunction with a loaded movement involving the same railcar (reciprocal switch or inter-terminal switch), the customer ordering the switch of the empty railcar will be assessed a charge of \$545 per railcar. The switching of another loaded railcar will not be considered as an offsetting movement.

## Section 2: Industries and Charges

Industries are listed in alphabetical order by rail station and are open to reciprocal switch via junction at that station unless otherwise noted.
