

I'm a resident of St. Paul and live adjacent to a main line. The last three weeks the union pacific has been bringing trains up into our residential area and leaving the trains sometimes for three days straight. A lot of times as soon as one pulls out another train will pull in and idle from 1 to 3 days. The engine running itself is very disturbing and in addition they run their compressor that is very disturbing. I have contacted the city Council, the mayors office, the county commissioner, and congresswoman Betty McCollum's office. The feedback I get is we're dealing with a sovereign nation mentality. This issue is really damaging our quality of life here.

Sincerely
Bill Nehring
