None

I am writing to request you deny any further development of the GLBT railway. The Illinois farmland you would take out of production is some of the most valuable, fertile land in the country and indeed the world. It seems almost criminal to take it out of production. You would be endangering many existing family businesses for the advancement of one business. Why would this one business be more important than the many existing businesses? As a small business owner, I feel this is an extremely dangerous precedent. Please deny the GLBT application.
