It is hard to believe that any government agency in our country would even consider the thought of granting eminent domain to a secret group of people so they can take large tracts of private property for personal use. It is one thing if it is done openly by a government agency paying market price for the good of all, it is a different matter completely if three people grant a secret group the right to steal private property for their own little agenda. If this is even considered, all is lost as far as hope for our country and simple rights of ownership. It would make third world dictators blush. This is the United States of America we are supposed to be the example for the world on doing things the right way, not a bunch of heavy handed thugs stealing our own people's lifetime of work for a secret select few. We have the right to know who is behind the taking of over 23,000 acres of land beyond the puppet strings of Frank Patton. Deny the order of protection confidentiality agreement!
