June 16, 2017
Part of
Public Record

After reviewing the available information about the proposed Great Lakes Basin (GLB) rail project, it is my opinion that the proposed GLB project has failed to sufficiently provide documentation that supports public convenience and necessity. For the following reasons I respectfully request that the STB cease any further action on this project.

Reasons against this project are abundant and have been expressed countless times. The citizens affected by this application for a permit by GLBT are standing firm and united against this project and our numbers are growing daily. I would be interested in knowing how many citizens have contacted STB stating they are in favor of this project. ?? That would be a statistic to consider. I hereby request that any and all permits applied for by GLBT be denied.

The above provided information is what led me to the conclusion that the proposed GLB project is inconsistent with the public convenience and necessity. It was insufficiently vetted before starting the approval process. I respectfully request that the STB takes "no action" on this project.
