I am a Farmer that owns ground along the proposed route. I wish to farm the land that I have been making payments on my entire life. I do not wish to have my land bought cheap so someone else can make massive profits for unknown investors. If they would like to start at about \$50k/acre that is a different story. I would love to see this proposal stopped as no one I talk to or anything I read sees the need for the tracks or toll way.

Thank You, Shane Isham
