The railroad project needs to be terminated. No more applications or dragging this absurd idea along any longer. The addition of a railroad of this magnitude would have an impact on the response time for Fire trucks and other fire vehicles. When something is on fire and people's lives are in danger response time is critical to the outcome of an event and the safety of people. THIS RAILROAD PROJECT MAKES PEOPLE LESS SAFE DUE TO RESPONSE TIME OF FIRE TRUCKS AND ALL EMERGENCY VEHICLES. I strongly oppose anything to do with this railroad.
