ETHICS. The entire proposed concept of this railroad project is unethical in every sense of the word. I can't believe I have to even spell this out and explain it to these people. That alone tells me just how thoughtless these people are. They don't seem to care about how badly this affects people's lives. To think that they can just come in and take land from people against their will is just WRONG. How do these people not know this is ethically wrong? I am the fourth generation to keep our farm going and they think they can just take that from me after all of my families hard work? I won't allow this. STOP THIS RAILROAD PROJECT!

STRESS AND HEALTH PROBLEMS. Anybody that has dealt with a lot of stress before knows that it takes a toll on a person's body both physically and mentally. The stress of this railroad project is causing people stress and in turn is causing health problems. This whole railroad project needs to cease and desist. STOP AT ONCE!

LOWER PROPERTY VALUE. Everybody that is close to this railroad will see lower property value. Who wants to live next to something like that? Houses decrease in value and it is just a bad economic idea for the housing market.

FARMERS. Some of these farms have been in the family for hundreds of years passed down from generation to generation. The proposed railroad plan wants to just negate all the blood, sweat, and tears that these families have poured their heart and soul into over the years. These people obviously don't care about farmers and the hard work and dedication that is done to help provide food and renewable resources for this country. As a farmer this is a sign of disrespect that I don't appreciate. Again, it comes down to how unethical this project is. STOP THIS PROJECT NOW!

DANGER TO WILDLIFE AND ANIMAL RIGHTS. With this proposed mass construction of this railroad through rural areas, wildlife will be affected. Their natural habitats would be destroyed and likely loss of animal life. The enclosed picture is a picture of a bald eagle on one of my family's farms. The Eagle is nested there and you want to destroy his home? This is just WRONG! STOP this railroad project now
