I'm writing to STB opposing the proposed railroad that Mr. Patton wants to build. There is no need for this thing to be built. There's a program, CREATE, which is addressing the congestion in Chicago and is making great strides. There is no way that private property should be seized by a private citizen for private wealth. Eminent Domain. This company is a FOR PROFIT proposal. No Class 1 rail company has signed up to say they will use this. No Build is the answer.
