I am pleading with officials to deny the motion of protection to withhold finance information from the public. This is a huge project the directly impacts all of us, farmers, landowners, and residents, and we deserve to know all we can about the financing. I feel it is an unnecessary railroad and dangerous to our environment. The possibility of contaminating fertile agricultural land and wetlands, along with disrupting rural roads is a prominent concern. Perhaps any tax money would be put to better use in improving the Chicago railroad hubs so freight can be moved more quickly through already established routes. Thank you, Nancy Pirrello
