Reference Docket No. AB 1256

AS a FORTY TWO YEAR RESIDENT , residing at 44 Forest Road Wilton New Hampshire, I am writing to petition in opposing to the request by the Boston and Maine Corporation and the Springfield Terminal Railway Company(PAN Am) to discontinue the operating authority held by the Milford-Bennington Railroad Company over a rail line on the Hillsborough Branch.

This Branch has been used to haul gravel from Wilton to Milford. If this branch is discontinued my family property and personnel safety will be at risk. The estimate is 90 gravel trucks will have to pass my house a day to replace the loss of the rail branch. Our house sits within 12 feet from the Forest Rd road surface.

The limited number of trucks going by now are traveling to fast to stop as they approach the village.  
With and increase to 90 trucks a day the INSURANCE risk is going to rise exponentially ..

I would vehemently urge the Surface Transportation Board to reject the proposal by Pan Am

Thank You

Residents:
