GLBT should not be given an order of protection for the privacy of its investors. The people in charge of GLBT are invading every aspect of my life, my net worth and my personal assets by forcing my property value to the lowest it's ever been. My property value will be \$0.00 if no one is willing to live next to multiple train tracks and toll roads. They know economically where all of us stand we should be entitled to the same from GLBT. We should know who is paying for our misery from both Frank Patton and his money backers and where their money comes from. Please drop any consideration of granting them a safety shield if you are not granting one to every land owner in the path of this fiasco as well adjoining land owners who just get burned all around. thank You.
