Public Record

I am a concerned citizen. We bought this property a year ago hoping to get away from the noise and traffic, and now it is going to be right in my backyard. I have a right to know who will take it away from me!!!! The neighbors have had their land in their family since Lincoln was president. My other neighbor holds rodeos on their property for charity. There are a lot of little things that families do with their lives and homes that you have to take into account! Most farmers are hardworking kind giving people!
