I am writing to oppose the GLB rail. This railway is unnecessary and will only cause harm, not good. The GLB will only cause pollution to our valuable farm land and wilderness. This country needs farm land to put food on Americans tables. Farmland is already being turned into shopping malls everyday. What happens when this country has not more farm land. We will once again rely on another country to support us. Let's try to build this countries independence not demenish it. This railway will take up land and pollute our environment. Would you want this running through your back yard or having your kids near it. Please vote against this unnecessary railway.

Thank you for your time
