I am requesting that the STB deny the Motion for Protection Order to Frank Patton and his undisclosed investors. There should be absolute transparency in this financial endeavor, disclosing every available detail as to who the investors are, their ability to finance this project, and include their expertise and experience in their business plan. The public needs to be protected from a future project failure. As a landowner/adjacent landowner, we deserve to know who is behind this threat to our community, safety, and personal property.
