The project proposed to put a railroad through Ogle County in Illinois is a bad idea and I strongly am opposed for many reasons. But for now I will talk about just one of the reasons. Highway 251 between Highway 64 and Highway 38 absolutely cannot have a train running across the road or over the road because this is an emergency route for when an accident or other catastrophic event happens on Highway 39. Highway 251 becomes the detour route when Highway 39 is shutdown. Putting a train over Highway 251 would absolutely be a traffic hazard. Emergency routes cannot be blocked. I OPPOSE any thing that has to do with putting this railroad project up.
