Part of
Public Record

The public has a right to know who is behind the Great Lakes Basin Project. This information should be readily available and their lack of forthcoming just show their own investors do not want to be associated with the project. I am asking their names be released to the public. Their citing of other cases as reason to allow this action is not sufficient. By their own admission this is the largest project of its kind in 100 years and as such that means not prior cases are relevant to this case. You can not compare a small rail line connecting other lines to this project and their request to do so is absurd.
