To Surface Transportation Board Members: We have a garden of Eden that the GLB RR plans on running tracks right over us. Because there is no house on this property, it seems it is OK run right over where we spend 40% of our time year round. This is where we are saving the soil from crop production because we believe the soil needs to build itself back up through time. We have been planting trees instead of crops at our own expense for 25 years while paying taxes on land that is not producing because we believe in leaving fertile soil for future generation to grow healthy food. Now our garden of Eden will be run over by GLB RR that will produce nothing but money to someone. This is counterproductive to life itself. As stewards of this garden, we must protect it from destruction. This ripping apart Nature is totally senseless. If you knew what this RR will destroy, you would say NO WAY! Before you agree to allow this RR, come see what it will destroy. Do the right thing and tell GLB it cannot build at all.
