To whom it may concern: Please deny the application for the Great Lakes Basin Railroad project. This is a shameful abuse of eminent domain for private gain. My home is less than 1/4 mile from the proposed route and the noise pollution will ruin the enjoyment of my country property. Already my home value has dropped and it would be impossible to sell without loss due to the threat of the railroad. There is one main road to town which may not even have a crossing adding additional 20 min travel for my work. This plan is a disaster ruining prime farm land through all the counties.
