Public Record

This note is asking you to deny the request for order of protection of GLB investors. Who are the people supposedly backing this project, uprooting families from family farms, and turning lives of many other families upside down. The area they are wanting to take not only involves prime farm ground, but includes an entire township, a good portion of a school district that has won many national awards, a church that has been established for over 145 years, two cemeteries - can they at least have some respect for these families, and many single family homes. All of which people have worked hard to establish. Do not take it away...this is not just flat ground in the area they are considering for the rail yard.
