Object to the proposal of the Great Lakes Basin Transportation. There is no approach to common sense to this proposal and the vagueness is disingenuous. 2 examples.... 1. Proposed project was 8 billion dollars. Now it is 2.8 billion dollars with no explanation of why. How does this happen? and now kicking in a Toll Road which prior was not even mentioned. 2. How could a short rail-line railroad have the need for 15,000 acres train yard, when the largest rail line in the world has less than 3000 acres?

Members of STB---keep your sharps on and don't get duped!!!!
