ENTERED  
Office of Proceedings  
May 23, 2017  
Part of  
Public Record

This private for-profit upstart company without a history of building or transporting anything has so far failed to provide any factual information about need, public convenience or finances. A company which to this date has no publicly identified customers, no railroad or shipper has provided a Letter of Intent stating they would use the proposed rail! I strongly oppose this application and urge you to reject it, as it is most definitely not in the public interest.
