Part of
Public Record

I am very upset that the Government of both Noblesville and Fishers have pushed this thru without any consideration of the Public that want to save the train. Often holding public meetings without giving notification so those who fought against this had no knowledge of said meetings. I honestly believe this was a done deal 2 years ago as Fishers are allowing buildings to be built so close to the rails that the train would almost be touching. It started when they would allow the train to run for the fair last year.

The train could be used for so many fun events connecting with downtown Indianapolis if they would connect to a short spurt to allow it to run. We have pro Football, Pro Basketball both men and women plus numerous other events that the train could be made use of and not have to drive the distance from Noblesville or Fishers

The picture I attached is taken at the back parking lot of Fishers facing south at an Apartment Building that was built last year and a warehouse across the track. There are more warehouses just North of 126 that back up to the track also

I certify that these comments have been provided to the Applicants Attorney of Record via email.
