Part of
Public Record

I am encouraging the cities of Noblesville and Fishers to preserve the Nickel Plate railroad instead of ripping it out for a biking trail. From recent survey information that has been revealed a majority of the residence who responded want to save the railroad and do not want a biking trail.

From my family's use of the railroad the lack of it's availability has made State fairtime a horrible experience due to the excessive traffic and parking availability. Using the railroad to get the fair was a wonderful and relaxing experience as were all the other rail excursions that were provided by the ITM.

I certify that these comments have been provided to the Applicant's Attorney of Record via email.
