Public Record

The court system has ruled that they can block President Trump's travel ban based on the statements he made while campaigning. This same standard should be used to judge the Great Lakes Basin project, for once you look at some of the comments their founder has made one sees just how badly the project does not serve the public's interests. Frank Patton at one meeting when asked about safety, said he can not control people who want to kill themselves, he has said his bridges will be tourist attraction as they will be among the largest in the world, he has said he deserves to create a legacy for his family, the insulting statements he has made can be listed out for days, his words clearly indicate he has no concern for the public. He is a profits at all cost operator and as such we must judge the project not just by the application but also by the statements the applications submitter has made. If President Trump can have Executive orders over-turned based on what he spoke, so too should the Great Lakes Basin project be judged. Please issue an immediate no build ruling.
